BROMINATING TABLETS

Aquabrome® Brominating Tablets, when used as directed, are effective as a swimming pool water sanitizer and disinfectant. **WARNING:** Direct tablet contact may cause bleaching of vinyl or painted pool surfaces. Automatic feeding devices employing these tablets must be totally free from traces of other pool sanitizers to avoid the probability of an explosion.

DIRECTIONS FOR USE: The filtration system should be in proper working order; the pH adjusted to between 7.2 and 7.8; the total alkalinity maintained at 100 to 150 ppm and the calcium hardness maintained at 150 to 300 ppm. A bromine residual of 1.0 to 2.0 ppm must first be established in the pH adjusted pool. If this is accomplished with a granular hypochlorite product, follow use directions on that products label. If the residual is established with Aquabrome Brominating Tablets in a brominator, use the brominator at the highest feed rate following the manufacturer's instructions. When the bromine residual reaches 1.0 to 2.0 ppm, adjust the feeder accordingly. To maintain a bromine residual, adjust the brominator feed rate to assure a constant treatment level of 1.0 to 3.0 ppm in residential pools and 3.0 to 5.0 ppm in larger, heavily used pools (normally 30 g to 180 g of this product per 10,000 L daily). Each Aquabrome Brominating Tablet weighs approximately 20 g. Actual use rates vary depending on organic load and environmental conditions. The regular use of a good test kit will determine if further adjustments are needed. Do not swim in the water if the residual is above 5.0 ppm. Periodic superchlorination of pool water is recommended. Follow label instructions of superchlorination product being employed.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. Poisonous if swallowed. Do not breathe dust. Irritating to nose and throat. Do not get in eyes or on skin, may result in severe chemical burns. Wear goggles or face shield and rubber gloves when handling. Corrosive. Wash hands thoroughly after handling. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Mix only with water. Use clean, dry utensils and equipment. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with the generation of heat, hazardous gases, and possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. If necessary, flood with large volumes of water.

ENVIRONMENTAL HAZARDS: Toxic to fish. Do not discharge where it will drain into lakes, streams, ponds or public water.

STORAGE: Keep product dry in tightly closed original container when not in use. Store in a cool, dry, well ventilated area away from heat, open flame, sunlight and other chemicals.

DISPOSAL: Do not reuse container. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

FIRST AID: If swallowed, feed bread soaked in milk, followed by olive oil or cooking oil. Do not induce vomiting. Do not give anything by mouth to an unconscious person. Seek medical attention immediately. In case of eye contact, flush eyes with cold water for at least 15 minutes. Seek medical attention promptly. In case of skin contact, brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation develops, seek medical attention. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.
