Q-4

DISINFECTANT CLEANER

CLEANER - DISINFECTANT - DEODORIZER -

FUNGICIDE - VIRUCIDE* - MILDEWCIDE -

SANITIZER WITH ORGANIC SOIL TOLERANCE

For Hospital, Institutional and Industrial Use

COMMERCIAL

GUARANTEE:

Didecyl dimethyl ammonium chloride..... 4.25%

KEEP OUT OF REACH OF CHILDREN

WARNING

POISON

CORROSIVE

READ THE LABEL BEFORE USING

MANUFACTURED BY:

HOLLAND
CHEMICAL & JANITORIAL SUPPLY LTD.
2736 MEIGHEN ROAD
WINDSOR, ONTARIO N8W 4C8

CONTENTS:

5L 20L 205L

Cross-contamination is of major housekeeping concern not only in hospitals, but in schools, institutions, and industry. Q-R DISINFECTANT CLEANER is formulated for this problem area. It both cleans and disinfects effectively and is virucidal when used as directed. Its hard surface disinfecting action will reduce the hazard of cross-contamination. Inhibits the growth of mold and mildew and their odors.

CAUTIONS:

Keep out of reach of children. May cause severe eye irritation or eye damage. Causes skin irritation. Do not get in eyes, on skin or on clothing. Harmful if swallowed. Avoid contamination of food.

CONTAINER DISPOSAL

Triple rinse (or equivalent) and dispose in an incinerator or regular trash collection.

FIRST-AID

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before re-use. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution; or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

TOXICOLOGY: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

NOTICE TO USER

This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.

DIRECTIONS FOR USE

Q-4 DISINFECTANT CLEANER is a proven "one-step" cleaner-disinfectant-sanitizer-fungicide-virucide-mildewcide in the presence of moderate amounts of organic soil. Apply Q-4 DISINFECTANT CLEANER to walls, floors and other hard (inanimate) non-porous surfaces such as tables, chairs, countertops, sinks and bedframes with a cloth or mop so as to thoroughly wet surfaces. For heavily soiled areas, a preliminary cleaning is

required. Prepare a fresh solution daily or when use solution becomes visibly dirty.

Disinfection - to disinfect hard, non-porous surfaces, add 20m1/L water. Treated surfaces must remain wet for 10 minutes. At this use level Q-4 DISINFECTANT CLEANER is also virucidal, fungicidal, and mildewstatic. The broad spectrum activity of Q-4 DISINFECTANT CLEANER has been evaluated in the presence of 5% serum and found to be effective against the following organisms by the AOAC USE-DILUTION test.

Pseudomonas aeruginosa
Staphylococcus aureus
Escherichia coil
Streptococcus pyogenes
Proteus mirabilis
Klebsiella pneumoniae
Enterobacter aerogenes
Salmonella schottmuelleri
Streptococcus faecalis
Shigella dysenteriae
Brevibacterium ammoniagenes

AOAC Fungicidal Test Q-4 DISINFECTANT CLEANER is an effective fungicide against Trichophyton mentagrophytes (the athlete's food fungus) when used on surfaces in areas such as locker rooms, dressing rooms, shower and bath areas, exercise facilities, etc.

Mildewstatic Performance. At 20 m1/L Q-4 DISINFECTANT CLEANER will effectively inhibit the growth of mold and mildew and the odors caused by them when applied to hard, non-porous surfaces (as indicated above). Allow to dry on surface and repeat when mildew growth returns.

Virucidal Performance . At 16m/L use-level, Q-4 DISINFECTANT CLEANER was evaluated in the presence of 10% serum and found to be effective against the following viruses. Herpes Simplex, Vaccinia, Adenovirus Type 5, and influenza A2, on inanimate environmental surfaces.

Sanitizing-Non-Food Contact Surfaces (such as floors, walls, tables, etc.) At 4m1/L use level, Q-4 DISINFECTANT CLEANER is an effective sanitizer in waters of up to 1000 ppm hardness against Staphylococcus aureus and Klebsiella pneumoniae in the presence of 5% serum on hard porous environmental surfaces. Treated surfaces must remain wet for 60 seconds.
