Duratan(R) is a registered trade name of Western Wood Preservers Ltd. This preservative is manufactured by Consolidated Coating Corp. to Western Wood Preserver's formulation.

DURATAN(R) WOOD PRESERVATIVE
BROWN TINT
with 10% Linseed Oil

A combination wood preserver and stain for the lasting protection
of all your outdoor building projects.

Ideally suited for protection of freshly cut ends of preserved lumber and restoration of cedar products that are showing signs of weathering.

USES: Typically for preserving lumber, boards, and timbers for fencing, decking and landscaping applications, especially ends of freshly cut and exposed preservative treated wood. Also helps restore colour and texture to heavily weathered cedar products. Effective for above ground applications only.

APPLICATION: Apply by liberal brush application, coarse spray, or dip treatment. Typical coverage 5 square metres per litre. SHAKE WELL BEFORE USE.

FIRST AID TREATMENT: Contains petroleum distillate. If swallowed do not induce vomiting. Call a physician immediately.

CAUTION: Keep away from spark or open flame.

Do not apply to wood where the preservative may become a component of food, feed or drinking water.

DISPOSAL: Dispose of empty container by wrapping it in newspaper and disposing with household garbage. Store unused product out of reach of children.

Wear approved face mask and eye protection if spraying the product. Zinc naphthenate contact may be irritating to the skin and it is recommended that plastic gloves be worn at all times during application of product.
