DIRECTIONS FOR USE

GENERAL: Use Adams Surface Spray as a spot treatment to control cockroaches, silverfish, ticks, fleas and other insects listed below. Apply this product as a coarse spray to localized areas where pests are found or may occur. Spray surfaces until wet. Repeat as needed.

TO KILL COCKROACHES, ANTS, CRICKETS, SILVERFISH, SPIDERS AND SOWBUGS: Spray areas where these pests are found or may hide, including dark corners of rooms and closets; cracks and crevices in walls; along baseboards and door and window frames; behind and beneath sinks, stoves, refrigerators and cabinets and around garbage cans, plumbing and other utility installations. Pests driven out of hiding places should be sprayed directly. For ants, apply to ant trails, around doors and windows and wherever else these pests may find entrance. Repeat as necessary.

TO KILL BROWN DOG TICKS AND FLEAS: Thoroughly apply as a spot treatment to infested areas such as pet beds and resting quarters, nearby cracks and crevices, along and behind baseboards, window and door frames and localized areas of floor and floor coverings where these pests may be present. Old bedding should be removed and replaced with clean, fresh bedding after treatment. Do not use on bedding for cats and kittens. **DO NOT SPRAY PETS WITH THIS PRODUCT.** Treat pets with one of our registered flea and tick control products before allowing them to enter treated area.

FLIES AND MOSQUITOES: Use only out-of-doors as an aid in reducing annoyance from these insects. Spray outside surfaces of window and door frames as well as other areas where these pests may enter the home. Also spray dark corners and localized resting areas (such as under eaves) on porches, patios and garages where these insects may congregate. Flies and mosquitoes coming to rest on treated surfaces will be killed. Repeat treatment when necessary.

PRECAUTIONS

HUMAN: KEEP OUT OF REACH OF CHILDREN. May be harmful if swallowed, inhaled or absorbed through skin. Avoid breathing spray mist and provide adequate ventilation of area being treated. Avoid contact with skin, eyes and clothing. Do not allow children to contact treated surface until spray has dried. Wash thoroughly with soap and water after handling. Do not use in commercial food processing or preparation areas. In the home, all food processing surfaces and utensils should be covered during treatment, or thoroughly washed before use. Cover exposed food.

ANIMAL: Remove pets and birds and cover fish aquariums before spraying. Do not allow pets to contact treated surface until spray has dried.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Do not add directly to water. Do not apply where runoff is likely to occur.

FIRST AID: If in eyes, immediately flush with plenty of water. Get medical attention if irritation persists. If swallowed, get prompt medical attention. If on skin, wash affected area with soap and water.

TOXICOLOGICAL INFORMATION: Product contains a cholinesterase inhibitor (chlorpyrifos). If clinical signs of cholinesterase inhibition appear, atropine, by injection, is the antidote of choice.

STORAGE AND DISPOSAL

STORAGE: Store in a cool, dry area away from heat and open flame. Do not contaminate water, food, or feed by storage or disposal. Do not transfer contents to other containers.

DISPOSAL: Do not reuse empty container. Wrap container in several layers of newspaper and discard in garbage.
