DIRECTIONS FOR USE:

For the preservation of exterior seasoned wood products:

For exterior use only. Not for use in dwellings.

For above ground use only. Apply to the wood surface only by brush for on site field applications.

For industrial use only in commercial spraybox, flow coating or dip tank. Equipment must be free of leaks. Equipment must have provision to eliminate or contain mist, overspray, drips and spillage into the surrounding environment.

Use of this product in industrial settings requires adequate engineered ventilation and containment in the treating areas and in the area where wood is dried.

Do not use the preservative or treated wood where Copper Naphthenate may contaminate food, feed or drinking water. May be used on greenhouse and garden timbers in contact with non-food producing plants only. Carrier solvent must be allowed to dry thoroughly before introducing plants to prevent phytotoxicity.

For fabric use:

For use only on exterior industrial fabric, duck cloth, awnings, etc.

Do not use on rubber lined fabric.

Not for use on fabrics which may come into prolonged contact with skin.

COPPERTOX is a wood preservative manufactured for the control of decay, termites, and woodborers in STRUCTURAL LUMBER. The wood should be dry for best penetration. Remove all layers of bark, paint, varnish, wax, or other films. Apply liberally 1-3 coats, allowing each coat to dry before adding the next. Use at the rate of 1 L of COPPERTOX per 4-10 m<sup>2</sup> of surface area. Allow the treated surface to dry thoroughly before applying paint or finish. Timber intended for contact with brickwork, concrete or the ground should be soaked in COPPERTOX for at least 1 hour. Use with caution on millwork such as door and window frames, where subsequent painting may cause bleeding. Do not treat surfaces which come in contact with food.

#### PRECAUTIONS

Avoid breathing concentrated vapour. Harmful if swallowed or inhaled. Use a cartridge respirator appropriate for the job conditions, e.g., poorly ventilated areas.

Wear rubber or plastic gloves and appropriate covering clothing when applying this product.

Use goggles in case of splash hazard.

Flammable. Do not use or store near open flame or spark, or in areas subject to excessive heat.

Keep out of reach of children and animals.

Do not contaminate bodies of water. This product is toxic to fish.

#### FIRST AID

If swallowed, do not induce vomiting. Call physician immediately.

If splashed in eyes, flush with clean water for 15 minutes and contact a physician.

In case of skin contact, remove the product from the skin promptly by washing with hand degreaser and then with soap and water.

#### TOXICOLOGY

Contains petroleum distillate and Copper Naphthenate. Treat as for ingestion of kerosene.

#### DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to the treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal or reconditioning.
3. Dispose of the container in accordance with provincial requirements.
4. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the regional office of Conservation and Protection Service, Environment Canada.
5. For small spills, recover free liquid. Soak up residue with solid absorbent. Do not flush into surface streams. Inform Environment Canada.

#### NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

#### NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
