MYCO-TECH™ Paste
A Vegetation Management Product

FOR SALE / FOR USE IN BOREAL AND MIXED FOREST REGIONS, EAST OF THE
ROCKY MOUNTAINS ONLY

**For inhibition of regrowth on cut stumps of deciduous tree species, in right's-of-way and
conifer release management situations.**

COMMERCIAL

GUARANTEE: *Chondrostereum purpureum* (strain HQ1).....min. of
10⁵ colony forming units/mL

GENERAL INFORMATION

Chondrostereum purpureum is a naturally occurring fungal organism commonly found in the temperate deciduous forest. It plays a beneficial role in wood decay and recycling processes. When applied to stems, freshly exposed by transverse cutting close to the ground, it colonizes the stump and inhibits sprouting and regrowth. Subsequently, decomposition of the wood is accelerated. **Myco-Tech™ Paste** increases the efficiency of mechanical cutting operations by reducing the increased density of stems, which often occurs following a mechanical cut. The fungus is active only on susceptible deciduous woody species, with the level of activity varying amongst species in relation to their regenerative sprouting ability.

DIRECTION FOR USE

Myco-Tech™ Paste must be applied during the growing season, from early spring to early fall (i.e., June to September) and when conditions are conducive for fungal growth and development. Spread a thin layer of product over the surface area of freshly cut stumps within 30 minutes of cutting. A single topical application is sufficient to colonize the stump and inhibit sprouting and regrowth on the following species: birch, pin-cherry, poplar/aspens, and red and sugar maple. Treatment of a typical population of 30,000 stems per hectare will require about 30 L of **Myco-Tech™ Paste** (on average 1 mL per cut stump). The degree of efficacy achieved may be affected by seasonal growth variations as well as the occurrence of heavy rainfall immediately before or soon after application.

PRECAUTIONS

May cause sensitization. Avoid contact with skin, eyes or clothing. Wear a long sleeved shirt, long pants, shoes plus socks, waterproof gloves, and eye goggles when handling, mixing/loading or applying the product and during all clean-up/repair activities. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash with clothing detergent and hot water before reuse. Keep and wash protective clothing separately from other laundry.

Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Keep out of lakes, ponds, or streams. Do not contaminate water by cleaning equipment or disposing of equipment washwaters.

FIRST AID

IF ON SKIN/CLOTHING Take off contaminated clothing. Rinse skin immediately with plenty of water.

IF IN EYES Hold eye open and rinse slowly and gently with water. Remove contact lenses, if present, then continue rinsing eye.

GENERAL Seek medical attention IMMEDIATELY if irritation occurs and

persists or is severe. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

STORAGE

Keep in original container during storage. Store in a secure, dry place at temperatures between 2°C and 6°C. Do not contaminate water, food or feed by storage. This product should be used within 3 months of the date of manufacture.

DISPOSAL

Thoroughly empty the contents of the container into the applicator. Follow provincial instruction for any required additional cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean up of spills.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and, subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of the product and accepts the product on that condition.
