PEST CONTROL PRODUCTS ACT

SUPER-12 is a high strength sodium hypochlorite solution which exhibits excellent algaecidal properties. Proper use of SUPER-12 in conjunction with a regular maintenance program will give a sanitary pool, free of harmful micro-organisms.

DIRECTIONS:

1. Maintain proper daily levels as determined by testing kit:
Free Available Chlorine:.....1.0 - 3.0 ppm
pH:.....7.2-7.8
Total Alkalinity:.....100 - 120 ppm
Calcium Hardness:.....200 - 300 ppm
2. Superchlorinate pool water initially with 1 litre SUPER-12 per 10,000 litres of pool water.
3. For best results superchlorinate at dusk.
4. Chlorinate daily to maintain proper chlorine residual with 250 millilitres of SUPER-12 per 10,000 litres of pool water, or as needed. NOTE: Hot weather, heavy pool usage and rain, may require high dosage rates to maintain proper chlorine residuals.
5. Superchlorinate weekly with 1 litre SUPER-12 per 10,000 litres when average daily temperature is 25°C - 32°C. Otherwise, superchlorinate every other week.
6. For visible algae, superchlorinate with 2 litres per 10,000

litres of pool water. Heavy algae infestation may require dosages up to 3 L per 10,000 L. Wait at least 24 hours and vacuum pool when dead algae settles.

7. For wading pools, chlorinate daily to maintain chlorine residual of 3-5 ppm by adding 45 mL per 1,000 L of pool water, or as needed.

NOTE:

For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of cyanuric acid (stabilizer).

PRECAUTIONS:

- Keep out of reach of children.
- Do not mix with any other chemical.
- Dangerous gas formed when mixed with acid.
- Avoid contact with skin and eyes.
- Harmful if swallowed.
- Keep container closed and store in a cool location.
- Rinse container thoroughly before discarding.
- To dispose of chemical, flush into sewer with large quantities of water.

FIRST AID:

If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact get medical attention. If swallowed, drink one or two glasses of milk or warm water. Call a Physician IMMEDIATELY. Keep patient warm.

STORAGE:

Use at once-stability maximum 6 months. Do not store in trunk of car for extended periods of time.

GUARANTEE:

(When packaged) Sodium Hypochlorite.....10.8%
Available Chlorine Content.....10.3%
