PRESSURIZED SPRAY

FRUIT SET

FOR TOMATOES

Guarantee:

Para Chlorophenoxyacetic acid 0.005%

Reg. No. 16516 Fertilizer Act

A proven plant growth regulator for positive fruit set.

CAUTION

EXPLOSIVE

READ THE LABEL BEFORE USING

Wilson's Fruit Set is a hormone-like plant growth regulator for setting fruit without natural pollination. Especially effective in cool weather early in the season. Handy, easy-to-use aerosol, contains no fluoro-carbons.

DIRECTIONS: Hold can in upright position with valve pointed toward blossom clusters and from 30 cm to 40 cm away. Apply a light spray directly on the blossoms when most of the flowers are open. Do not spray cluster more than once and the plant more than five times per season. Do not apply to fruit or foliage.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Do not use on tomatoes grown for seed. Do not allow spray drift to contact other plants. Avoid contact with skin, eyes and clothing. Wash after use. Store away from fertilizer, pesticides and seeds.

Contents under pressure. Do not puncture or incinerate can. Do not use near heat or store at temperature above 50°C.
