DYRENE Turf Fungicide 50% WP

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the PEST CONTROL PRODUCTS ACT to use a control product under unsafe conditions.

DIRECTIONS FOR USE

DYRENE Turf Fungicide effectively protects grasses from various destructive diseases such as dollar spot and melting-out. Complete and thorough coverage of area is necessary for satisfactory control. For a preventive program begin applications before diseases appear and repeat treatments as needed, usually at intervals of 10 to 14 days, except during extended periods of cool, moist conditions, when applications every 7 days may be advisable. The spray program should be continued through the spring and summer months. Schedule applications in accordance with local conditions. Consult your local agricultural authorities for specific use information.

RECOMMENDED APPLICATIONS

CROP	DISEASE	DOSAGE DYRENE 50% WP	REMARKS
Lawns and Turf	Brown patch Copper spot Dollar spot Melting-out	125 to 250 g/100 m ²	Apply specified dosage in 20 L of water per 100 m ² . Repeat at 1 to 2 week intervals throughout the spring and summer months.

PRECAUTION

Keep children and pets off treated areas until this material has been

thoroughly washed into the soil and the grass has completely dried.

DANGER

Corrosive. Causes irreversible eye damage. Harmful if inhaled. DYRENE may cause an allergic skin reaction in some susceptible persons. This condition should be treated as an allergic dermatitis.

Wear goggles or safety glasses. Avoid breathing dust. Protective clothing and gloves should be worn during periods of exposure such as handling of concentrate, mixing, loading and application or when contacting treated foliage. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reusing.

Do not contaminate feed or food. Keep out of reach of children.

FIRST AID: In case of poisoning, call a physician immediately. Have patient lie down and keep quiet. If swallowed, vomiting should be induced. Administer milk or water freely and induce vomiting by giving one dose (15 mL) of syrup of ipecac. If vomiting does not occur within 10 to 20 minutes, administer a second dose. If syrup of ipecac is not available, induce vomiting by sticking finger down throat. Repeat until vomit fluid is clear. The patient should be lying down with the head below the foot level and facing down or to one side. Professional medical assistance should be secured immediately. DO NOT INDUCE VOMITING TO AN UNCONSCIOUS PERSON OR TO PERSONS IN A CONVULSIVE STATE. If on skin, remove contaminated clothing and wash skin immediately with soap and warm water. If eyes are contaminated, wash immediately with flowing water for at least 15 minutes.

TOXICOLOGICAL INFORMATION: The exact toxic mode of action of DYRENE is not known. In experimental animals acutely poisoned with DYRENE no characteristic symptoms were noted. The patient should be treated symptomatically.

DISPOSAL OF EMPTY CONTAINER:

1. Do not reuse the container.
2. Completely empty the bag into application equipment and add all rinsings to the spray mixture in the tank.
3. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
4. Dispose of the empty bag in accordance with provincial requirements.

5. For information on the disposal of unused, unwanted product and the cleanup of spills contact the regional office of Conservation and Protection, Environment Canada.
