MOR-CHLORINE

CONTROLS BACTERIA AND ALGAE
IN SWIMMING POOL WATERS

NET CONTENTS: 20L

CHLORINATING LIQUID

IMPORTANT READ LABEL BEFORE USING

DOMESTIC

REGISTRATION NO. 21137

PEST CONTROL PRODUCTS ACT

Mor-Chlorine is a high strength sodium hypochlorite solution which exhibits excellent algaecidal properties. Proper use of Mor-Chlorine in conjunction with a regular maintenance program will give a sanitary pool, free of harmful micro-organisms.

DIRECTIONS

1. Maintain recommended daily levels as determined by testing kit:

Free available chlorine.....	1.0-3.0 ppm
ph.....	7.2-7.8
Total Alkalinity.....	100-120 ppm
Calcium Hardness.....	200-300 ppm
2. Superchlorinate pool water initially with 1 litre Mor-Chlorine per 10,000 litres of pool water.
3. For best results superchlorinate at dusk.
4. Chlorinate daily to maintain proper chlorine residual with 250 millilitres of Mor-Chlorine per 10,000 litres of pool water, or as needed. NOTE: Hot weather, heavy pool usage and rain, may require high dosage rates to maintain proper chlorine residuals.
5. Superchlorinate weekly with 1 litre per 10,000 litres when average daily temperature is 25°C-32°C. Otherwise, superchlorinate every other week.

6. For visible algae, superchlorinate with 2 litres per 10,000 litres of pool water. Heavy algae infestation may require dosages up to 3L per 10,000L. Wait at least 24 hours and vacuum pool when dead algae settles.
7. For wading pools, chlorinate daily to maintain chlorine residual of 3-5 ppm by adding 45 ml per 1,000 L of pool water or as needed. NOTE: For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of cyanuric acid (Stabilizer).

PRECAUTIONS:

- Keep out of reach of children.
- Dangerous gas formed when mixed with acid.
- Do not mix with any other chemical.
- Avoid contact with skin and eyes.
- Harmful if swallowed.
- Keep container closed and store in a cool location.
- Rinse container thoroughly before discarding.
- To dispose of chemical, flush into sewer with large quantities of water.

FIRST AID:

If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed drink one or two glasses of milk or warm water. Call a Physician IMMEDIATELY. Keep patient warm.

STORAGE:

Use at once - stability maximum 6 months. Do not store in trunk of car for extended periods of time.

GUARANTEE:

(when packaged) Sodium Hypochlorite.....10.8%
 Available Chlorine Content.....10.3%
