D-CHLOR is a high strength sodium hypochlorite solution which exhibits excellent algaecidal properties. Proper use of D-CHLOR in conjunction with a regular maintenance program will give a sanitary pool, free of harmful microorganisms.

DIRECTIONS FOR USE:

1. Maintain proper daily levels as determined by testing kits:  
Chlorine:                    1.0 - 3.0 ppm  
pH:                            7.2 - 7.8  
Total Alkalinity:            100 - 120 ppm  
Calcium Hardness:           200 - 300 ppm
2. Superchlorinate pool water initially with 1 litre D-CHLOR per 10,000 litres of pool water.
3. For best results superchlorinate at dusk.
4. Chlorinate daily to maintain proper chlorine residual with 250 millilitres of D-CHLOR per 10,000 litres of pool water, or as needed.

NOTE: Hot weather, heavy pool usage, and rain may require high dosage rates to maintain proper chlorine residuals.

5. Superchlorinate weekly with 1 litre per 10,000 litres if average daily temperature is 25°C - 32°C otherwise, superchlorinate every other week.
6. For visible algae superchlorinate with 3 litres per 10,000 litres of pool water. Wait at least 24 hours and vacuum pool to remove dead algae.

NOTE: For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of cyanuric acid (stabilizer).

7. For wading pools, maintain chlorine residuals of 3-5 ppm by chlorinating daily by adding 45 mL per 1000 L of pool water.

PRECAUTIONS:

- Keep out of reach of children.
- Do not mix with any other chemical.
- Dangerous gas formed when mixed with acid.
- Avoid contact with skin and eyes.
- Harmful if swallowed.
- Keep container closed and store in a cool location.
- Rinse container thoroughly before discarding.
- To dispose of chemical, flush into sewer with large quantities of water.

FIRST AID:

If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, give one or two glasses of milk and warm water. Call a physician IMMEDIATELY. Keep patient warm.

STORAGE:

Keep container closed and store in a cool location.  
Use at once - stability maximum 6 months.  
Do not store in trunk of car for extended periods of time.
