GOLDEN VIGORO(R)

CRABGRASS PREVENTER

For the control of crabgrass and other annual grasses on turf. Vigoro crabgrass preventer controls the crabgrass seedlings just as they are sprouting from the seed, but not after the growth has begun.

APPLICATION RATE

Apply 4.5 kg per 100 m² in spring before the forsythia blooms start to fall (early May).

DIRECTIONS FOR USE

Use a broadcast type spreader and for best results we recommend you apply in two applications, one at right angles to the other, each at one-half the rate. Water lawn thoroughly after application. Do not fill spreader on lawn. Shut the spreader off before stopping or turning. Remove all spills with a broom and water. Do not apply on lawns newly-seeded in the Spring. Wait until after mowing once to apply Vigoro Crabgrass Preventer. Avoid vegetable crops and bentgrass lawns. Do not seed treated area until Fall. Do not rake or disturb soil after application.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Avoid contact with eyes, skin and clothing. Avoid breathing dust. Store bag tightly closed and away from children and pets. Store in dry area away from seeds, feeds and other fertilizers.

First Aid: IF IN EYES: Flush with plenty of water and get medical attention. IF ON SKIN: Wash with soap and water. IF SWALLOWED: Get medical attention or contact a poison control centre.

Disposal Procedures: Discard empty bag in household garbage.

NOTE: Product should be used as recommended. It may prove harmful if misused.
