READ LABEL BEFORE USING

DITCHLING CORPORATION LIMITED
PO BOX 395,
DON MILLS, ONTARIO M3C 2S7

DIRECTIONS RODENT CONTROL: Rats: Mix thoroughly with a suitable bait, 1 part Warfarin concentrate with 19 parts bait. Place from 50 grams to 500 grams finished bait in areas frequented by rodents. Protect bait placements from children, pets and livestock. Where a continuous source of infestation prevails, permanent bait stations should be used and kept continuously filled with fresh bait. Mice: To control mice, follow the same general directions as for rats but baits may be smaller and more placements should be made. Mice are more difficult to control than rats and complete control may take longer period of baiting. IMPORTANT: Ensure that bait is always available to rodents until lack of feeding is noted. This should be from 5 to 14 days.

TOXICOLOGICAL INFORMATION: When a human has been known to have accidentally ingested Warfarin, blood transfusions combined with intravenous injections and oral dosages of Vitamin K1 are indicated as in case of hemorrhage caused by overdoses of Dicumarol.

CONTAINER DISPOSAL: Do not re-use container. Container should

be disposed of by punching holes in it and burying with wastes or by burning (keep out of smoke).

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

For use in processing plants (feed, food), Processing Plants (non-food), Food service Establishments, Storage areas (Feed, food), Storage areas (non-food), Dwellings, Buildings (outdoor surface), Outdoor living areas, Residential areas, Garbage dumps, Garbage containers, Outdoor areas, and Farm Buildings.

PRECAUTIONS: Avoid contamination of food and feedstuffs. Wash thoroughly after handling. Keep out of reach of children, pets and domestic animals. This product contains as its active ingredient an anticoagulant chemical which if taken accidentally by humans, animals, or pets may reduce the clotting ability of the blood and serious hemorrhage may result. In case baits are accidentally eaten, induce vomiting with a finger at the back of the throat and repeat until vomit fluid is clear. Call a physician.
