BRANCHES THROUGHOUT NORTH AMERICA

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NATURE OF RESTRICTION: This product is to be used in the manner authorized - provincial and federal regulations are in effect. For use by, or under the supervision of government agencies or pest control operators. Not for sale to the public.

DIRECTIONS FOR USE: Avitrol Whole Corn is a pesticide for the control of feral pigeons. It is composed of a choice pigeon food impregnated with the bird management chemical 4- Aminopyridine.

Untreated whole corn mixed as directed with Avitrol Whole Corn minimizes the possibility of distress symptoms which can occur when more than a sufficient quantity of Avitrol is ingested. Best results for the control of pigeons are obtained when a large portion of the flock is affected mildly. When properly administered few birds exhibit distress symptoms and little mortality occurs.

Prefeeding with untreated whole corn of the same appearance as the Avitrol carrier is usually essential to the effective deterrence of birds. Careful observation of bird habits should be made to establish proper feeding locations where no desirable or protected bird species are present that may be able to feed on Avitrol Whole Corn. After pest bird feeding is established, immediately replace untreated grain with Avitrol as directed below.

For the control of pigeons in urban areas violent flock alarming reactions produced by Avitrol which can be lethal are not generally desirable or necessary. To obtain minimum mortality the Avitrol Whole Corn should be thoroughly mixed with 29 parts of similar untreated whole corn. Using protective gloves, apply 1.4-1.8 kg of blended bait in high locations on buildings and ledges where prefeeding has been established. In most areas, where ample food is already available, a stronger dilution with 10 or 20 parts of untreated corn is recommended. Repeat treatment until bird numbers have been reduced to acceptable levels on the premises. Properly dispose of dead birds.

AVITROL MUST NOT BE EXPOSED IN ANY MANNER THAT MAY ENDANGER DESIRABLE AND PROTECTED BIRD SPECIES. IF THERE IS A QUESTION OF SUCH HAZARD, CONSULT LOCAL, PROVINCIAL AND FEDERAL GAME AUTHORITIES BEFORE UNDERTAKING BIRD MANAGEMENT WITH AVITROL, INVESTIGATE LOCAL LAWS THAT MAY PROHIBIT THE USE OF ANY TOXIC CHEMICAL IN BIRD CONTROL.

PRECAUTIONS: Keep out of reach of children and pets. May produce toxic symptoms if swallowed or by contact with the skin. Handle with protective gloves. Wash thoroughly with soap and water after handling, before eating or smoking. Change to clean clothing after handling. Do not feed to livestock or chickens. Do not mix grain for livestock feed or for human consumption. Do not contaminate streams, lakes or ponds with this material. Do not allow this material to remain in unprotected places after control measures are completed. Do not use where food (grain or meat) will become contaminated.

FIRST AID: If swallowed, induce vomiting by inserting the finger into the throat area of the affected individual. Have patient lie down and be quiet. Call a physician at once.

NOTE TO PHYSICIAN: Stomach lavage.

DISPOSAL PROCEDURE: Do not reuse empty container. Destroy it by burying with waste or burning. Stay away from smoke or fumes.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
