MOORWOOD PENETRATING CLEAR WOOD FINISH AND PRESERVATIVE

For Exterior Use On. Wood Siding, Shakes, Shingles and Textured Plywood.

Do not use on horticultural lumber, or in locations where food is stored or processed. Do not use for the interior of buildings.

Formulated to penetrate deeply into uncoated woods to prolong or restore a new wood appearance. Contains a preservative to protect against surface moulds. Resists mildew. Produces a rich amber or honey color on weathered wood.

- * Surfaces must be clean and dry, free from dirt, or other contaminants removed and mildew destroyed.
- * Old stain, paint or varnish must be removed and fresh wood exposed before application.
- * New smooth lumber and siding should be weathered 6 months or sanded to remove new wood glaze.
- * Pretest a small area to ensure that the result is satisfactory.
- * Stir well before and occasionally during use. Apply with brush or roller.
- * If first coat is absorbed quickly, do not allow Moorwood Clear to set up or dry before application of second coat, or a non-uniform gloss will result.
- * Do not tint or intermix.

FIRST AID INSTRUCTIONS: Contains petroleum distillate and Dichlofluanid. If swallowed, do not induce vomiting. Call physician immediately. If splashed in eyes or on skin, flush thoroughly with water. Contact physician if irritation persists.

CAUTION: COMBUSTIBLE - KEEP AWAY FROM FIRE. KEEP OUT OF REACH OF CHILDREN. USE WITH ADEQUATE VENTILATION. AVOID BREATHING OF VAPOR AND CONTACT WITH SKIN OR EYES. OBSERVE CLEANLINESS AND SANITARY PRECAUTIONS. KEEP CONTAINER CLOSED WHEN NOT IN USE.

DISPOSAL: Do not re-use empty container. Dispose of empty container in household trash. Store unused product out of reach of children or animals.
