GUARANTEE:

Paraquat (as dichloride).....2.5%
Diquat (as dibromide).....2.5%

CAUTION POISON

READ THE LABEL BEFORE USING

WILSON LABORATORIES
DUNDAS, ONTARIO

DIRECTIONS: Retain carton for direction for use.

Simply dissolve granules in water at the following rates and apply with a watering can or low pressure sprayer (large droplets). Thoroughly wet all unwanted weeds and grasses. Can be used right up to the base of trees, shrubs and hedges that have been established at least one year. Also between plants in flower and vegetable gardens, along fences, ditches, driveways, paths, patios.

Spray has no effect on mature brown bark. Do not allow spray to contact green bark or green foliage of desirable plants such as evergreens to avoid serious injury to these plants.

The spray becomes inactivated on contact with the soil and cannot spread to root zones or untreated areas. Seed or plants may be placed in treated soil three days after application. Remove dead vegetation before seeding.

RATE: When using a watering can with fine spray or dribble bar, dissolve 57 grams (the contents of one pouch) in 10 litres of water and apply to 20 square metres.

When using a low pressure sprayer dissolve 57 grams (one pouch) in 5 litres of water and apply to 20 square metres.

If weed growth is extremely dense reduce coverage to 10 square metres. Use of muddy water or spraying dust covered weeds reduces the effectiveness of Weedrite.

Apply Weedrite any time during growing season. Control is best when weeds are young. Repeat as necessary. Most annual weeds and grasses are killed with one treatment. Control of perennial weeds will require repeated applications.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. May be fatal if swallowed. Keep off skin and away from children and pets. Do not breathe spray mist. Wash after use. Avoid spray drift onto lawns, flowers, vegetables, green leaves or bulbs and other desirable plants. Wash equipment thoroughly immediately after use. Dispose of container in regular garbage. Do not reuse.

FIRST AID: If swallowed, induce vomiting immediately and call a doctor at once. If on skin, wash immediately and thoroughly with water. If in eyes, flush with plenty of clean water and call a doctor.
