## DIRECTIONS FOR USE

Corn Oil is a superior type agricultural spray oil formulated with a surfactant to be used in combination with a specific herbicide and water. The mixture of a specific herbicide listed below in this oil-water emulsion greatly improves their post emergent activity.

USE PRECAUTIONS: Caution is recommended when spray is applied under very hot (dry), humid conditions, cold weather, frost or under other conditions which may enhance the activity of the herbicide mixtures. Note that the risk of damage to other vegetation form spray drift is increased with the use of a specific herbicide mixtures in oil-water emulsions. Do not add any other herbicides or hormone type weed killers such as 2,4-D 2,4-DB, MCPA, MCPB, or Dicamba with any of the recommended combinations listed below.

SEEDLING WEEDS AND ANNUAL GRASSES: For increased activity and to extend the period of application of Atrazine, apply  $1-1.5~\rm kg$  (active) Atrazine post-emergence per hectare when the broadleaf weeds are  $5-10~\rm cm$  high and annual grasses are at the  $1-3~\rm leaf$  stage. Add the atrazine to the oil-water emulsion containing  $15~\rm litres$  of Corn Oil in  $150-300~\rm litres$  of water per hectare.

SEEDLING WEEDS AND ANNUAL GRASSES (PARTICULARLY GREATER CONTROL OF CRABGRASS): Apply 1.1 kg (active) Atrazine plus 1.1 kg (active) Simazine post-emergence when the broadleaf weeds are 5-10 cm in height and annual grasses are at the 1-3 leaf stage. The combinations of Atrazine and Simazine is applied in an oil-water emulsion containing 15 litres of Corn Oil in 150-300 litres of water per hectare.

CROP RESCUE TREATMENT - FOR WEEDS THAT HAVE ESCAPED PREVIOUS WEED CONTROLS: Apply Linuron at 1.1 - 2.25 kg (active) per hectare as a directed spray after corn is at least 25 cm in height. The Linuron is applied in an oil-water emulsion containing 2.5 L of Corn Oil. The mixture must be applied with special equipment to place the spray under the corn leaves, but on the weeds. This mixture will burn the corn leaves if they come in contact with the spray mixture.

Note: Some temporary injury to corn can occur when weed killers are applied in oil-water emulsions, if the crop is under stress conditions (unusually cold, hot or dry weather, etc.).

MIXING INSTRUCTIONS: Fill the spray tank half full with water, add the desired amount of herbicide and continue filling. Add Corn Oil last. After filling, continue agitation. Caution: Avoid violent agitation of the materials in the spray tank. Excessive agitation may produce an invert emulsion causing coagulation and setting of suspended materials.

## WARNING

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid contact with skin, eyes or clothing. Handle and apply only as directed and at recommended rates. Do not apply or allow to drift to areas occupied by plants, other than those being sprayed, or unprotected humans and animals. Do not contaminate water supplies, irrigation ditches, ponds, lakes or streams.

FIRST AID: This product contains a petroleum distillate. If swallowed, DO NOT INDUCE VOMITING. Contact a physician or poison control centre. If patient is unconscious, give air. If in eyes, flush with plenty of water for 15 minutes and get medical attention. In case of skin contact, remove contaminated clothing

and wash thoroughly with soap and water.

**STORAGE:** Keep container tightly closed and DO NOT allow water to be introduced to contents of this container. Do not store at temperatures below  $0\,^{\circ}\text{C}$ . Shake well if stored for one year or longer.

## DISPOSAL:

- 1. Rinse the emptied container thoroughly and add the rinsings to the spray mixture in the tank.
- 2. Follow provincial instructions for any required additional cleaning of container prior to its disposal.
- 3. Make the empty container unsuitable for further use.
- 4. Dispose of the container in accordance with provincial requirements.
- 5. For information on the disposal of unused, unwanted product and the clean-up of spills, contact the Provincial Regulatory Agency or the Manufacturer.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
