1 L

Concentrate

Safer Ltd.,
Scarborough, Ont. M1B 2K4

DIRECTIONS: Mix fresh solution. Made of selected soaps that have contact insecticidal properties. Insects must be sprayed directly to achieve proper control. Mix one part concentrate to 50 parts water, or 20 mL per 1 L. Aphids: Aphids fly outdoors from early spring throughout the summer and occur year round on plants indoors. Spray when sighted on buds, new shoots, stems and undersides of leaves. Repeat applications weekly for 2-3 weeks and thereafter as required. Whitefllys: These tiny moth-like insects can be found throughout the year on the undersides

of leaves on indoor plants and throughout the growing season on outdoor plantings. Repeat applications at two week intervals as required to control the scale-like larvae hatching from eggs. May be used up to day of harvest.

PRECAUTIONS: Concentrated soap may cause eye irritation. Avoid eye contact. Do not use on sweetpeas, nasturtiums or delicate ferns. May cause skin irritation. Wash fruits and vegetables before consumption.

FIRST AID: If in eyes wash with plenty of water. If concentrate on skin, rinse with water.
