AQUA SELECT
BROMINE TABLETS

DOMESTIC

CONTROLS BACTERIA AND ALGAE IN SWIMMING POOL WATER

WARNING

POISON

CORROSIVE

DANGER:

CORROSIVE TO EYES

READ THE LABEL BEFORE USING

KEEP OUT OF REACH OF CHILDREN

REG. NO. 23643.60
P.C.P. ACT

GUARANTEE:

1-Bromo-3-chloro-
5,5-Dimethyl Hydantoin.....95%
Provides: 63% Available Bromine
31% Available Chlorine

7 kg

Siege Social du Groupe Coop

Montreal (Quebec)
H2P 1E9

DIRECTIONS FOR USE

AQUA SELECT BROME TABLETS are a safe and effective slow dissolving bactericide, algaecide and disinfectant that, unlike other commonly used chemicals, performs well over a broad pH range. Use the dosages recommended below as a guide in determining the proper amount of AQUA SELECT BROME TABLETS necessary to keep your pool sparkling clean and inviting. The dosage necessary for your pool will change considerably depending upon those factors that burden the disinfection system.

Some of the factors that will vary the required dosages are water temperature, bather load, exposure to windblown debris, thunder or rain storms and length of filtration cycle.

SWIMMING POOLS: In newly filled pool, shock the pool if necessary. Follow directions for use on this label to establish an effective active bromine residual of between 1 and 3 ppm, pH 7.2 to 7.8, total alkalinity 100 - 150 ppm, and calcium hardness 200 - 300 ppm. Test water frequently using a reliable bromine test kit. Adjust the flow rate through the brominator if necessary, to maintain the active bromine residual. The following dosages are provided as a general rule of thumb. Automatic brominators have use instructions peculiar to their design. Frequently a brominator must be filled to capacity - while the adjustments allow the user to erode only the amounts of AQUA SELECT BROME TABLETS necessary for proper sanitation as suggested below, the slow dissolving nature of the chemical combined with the design features of the brominator require that a greater amount of chemical be exposed to the water. For shocking purposes use a non chlorine shock.

Add 1 - 2 tablets per 10,000 litres as needed to maintain a bromine residual of 1 - 3 ppm at all times. Daily usage should be approximate 25 g of AQUA SELECT BROME TABLETS per 10,000 L of pool water. Apply weekly dose through the use of a automatic brominator which will allow you to adjust the amount of bromine entering the water.

Each tablet weight: 24.5 g

PRECAUTIONS

Keep out of reach of children. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Avoid contact with skin and eyes. Avoid breathing dust. Harmful if swallowed. Keep container closed and store in a cool, dry location. Rinse container thoroughly before discarding. Do not reuse.

For information on the disposal of unused, unwanted product and the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.

WARNING

Direct tablet contact may cause bleaching of vinyl or painted pool surfaces.

Automatic feeding devices employing these tablets must be totally free from traces of other pool sanitizers to avoid the probability of an explosion.

FIRST AID

If splashed in eyes or on skin, flush thoroughly with water for

15 minutes. For eye contact, get medical attention. If swallowed, drink one glass of milk or water. Call a physician or poison control centre IMMEDIATELY.
