BACTOSOL is a cleaner-disinfectant-sanitizer-fungicide and mildew. All surfaces that come into contact with food are to be rinsed with potable water after disinfection. For hospitals, food processing plants, institutions, and sporting clubs. Use on walls, floors, table tops and other surfaces.

USE DILUTION

Disinfection, fungicide, mildewstat and cleaning: To disinfect hard, non-porous surfaces, 1:66 or 15 mL per liter of water dilution. Allow to remain wet for 10 minutes. BACTOSOL exhibits effective disinfectant activity against the organisms: *Salmonella choleraesuis* and *Staphylococcus aureus*. At this level, the product is also fungicidal against the pathogenic fungi *Trichophyton mentagrophytes* (athlete's foot). For hospitals: at 1:41 or 24 mL per liter of water, BACTOSOL is effective against *Pseudomonas aeruginosa*. Effective tests have demonstrated that BACTOSOL is an effective bactericide and fungicide in the presence of organic soil (5% blood serum). All surfaces that come into contact with food are to be rinsed with potable water after disinfection.

Sanitization: To sanitize previously cleaned and rinsed non-porous food contact surfaces: 1:166 or 6 mL per liter of water. Allow to remain wet for 60 seconds. Let air dry. BACTOSOL is an effective sanitizer when diluted in water up to 500 ppm hardness (CaCO₃). Prepare a fresh solution for each use.

PRECAUTIONS:

Keep out of reach of children. Danger: corrosive to eyes. Do not get in eyes, on skin or on clothing. Harmful if swallowed. Avoid contamination of food.

TOXICOLOGICAL INFORMATION:

Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

FIRST AID:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

STORAGE AND DISPOSAL:

Rinse the emptied container thoroughly and add the rinsings to treatment site. Follow provincial instructions for any required additional cleaning of the container prior to its disposal or reconditioning. Dispose the container in accordance with provincial requirements. For information on the disposal of unwanted product and the cleanup or spills contact the regional office of Environment Canada. For small spills, recover free liquid, soak up residue with solids absorbent. DO NOT FLUSH INTO SURFACE STREAMS. INFORM ENVIRONMENT CANADA.
