PRECAUTIONS:

HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS

DANGER

CORROSIVE

CAUSES EYE DAMAGE AND SKIN BURNS.

MAY CAUSE ALLERGIC SKIN REACTION. MAY BE HARMFUL IF INHALED.

MAY BE FATAL IF SWALLOWED OR ABSORBED THROUGH THE SKIN.

Do not get in eyes, on skin, on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing vapor or mist. Avoid breathing vapor or mist. Do not take internally. Wash thoroughly after handling.

ENVIRONMENTAL HAZARDS

This product is toxic to fish and wildlife. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of waters. Apply this product only as specified on this label.

STORAGE: Do not contaminate water, food or feed by storage or disposal. Open dumping prohibited. If plastic, do not reuse empty container.

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.

NOTICE TO USER: This control product to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the products on that condition.

#### DIRECTIONS FOR USE

##### METALWORKING FLUIDS

Kathon MWX is supplied as a premeasured packet for the control of bacteria and fungi in soluble and emulsifiable type aqueous metalworking fluids, including soluble oils, semisynthetic or synthetic fluids.

##### FOR TREATMENT OF 214 LITER SYSTEMS

For the maintenance of a non-fouled system, add one unopened 56 gram packet to 214 liters of metalworking fluid every 2-4 weeks. For a noticeably fouled system, use an initial dose of one or two unopened 56 gram packets per 214 liters of metalworking fluid every 1-2 weeks and follow with maintenance dosage noted above. Higher dosage range and/or frequency of treatment may be required depending on dilution of the preservative with makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

The unopened packet should be added at a point in the system, such as the sump or reservoir, where the timed release of the active ingredients will be uniformly dispersed throughout the metalworking fluid. Remove packet from system before the addition of additional packets or after 3 days. Dispose according to pesticide disposal instructions. Completely drain, clean and add fresh metalworking fluid and preservative every 3-6 months or when system shows signs of deterioration or fouling.

##### COOLING TOWERS/AIR WASHERS

Kathon MWX is recommended for the control of slime in cooling towers/air washers. Add 1-5 packets (56 grams each) per 5063 liters of coolant.

## PHOTOPROCESSING SYSTEMS

Kathon MWX microbicide as a premeasured packet for the control of bacteria, algae and fungi in photodeveloping wash water including motion picture, radiographic, micrographic, graphic arts and photoprocessing film.

### FOR TREATMENT OF 214 LITER SYSTEMS

For maintenance of a non-fouled system, add one unopened 56 gram packet to 214 liters of photodeveloping wash waters every 2-4 weeks. For a noticeably fouled system, use an initial dose of one or two unopened 56 gram packets per 214 liters of photodeveloping wash water every 1-2 weeks and follow with maintenance dosage noted above. Higher dosage range and/or frequency of treatment may be required depending on dilution of the preservative with makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

### FIRST AID

IF SWALLOWED: Do not induce vomiting. Drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician or poison control centre immediately.

IF INHALED: Remove immediately to fresh air. If not breathing, apply artificial respiration. If breathing is difficult, give oxygen. Call a physician or poison control centre.

IF ON SKIN: Remove contaminated clothing immediately. Wash skin with large quantities of water. Launder clothing before reuse.

IF IN EYES: Flush with plenty of water for at least 15 minutes. Call a physician.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsions may be needed. Skin burns and corrosion may be delayed for several hours.
