DIRECTIONS FOR USE

DORMANT SPRAY OIL is an emulsifiable type of mineral oil for use in the control of certain mites and insect pests attacking APPLES, APRICOTS, CHERRIES, PEACHES, PEARS and PLUMS.

| CROP   | INSECT   | RATE                                  | TIMING  |
|--|--|---------------------------------------|---|
| Apples,<br>Apricots,<br>Cherries,<br>Peaches,<br>Pears,<br>Plums | European red mite,<br>Leaf rollers,<br>Pear psylla,<br>San Jose Scale,<br>Lecanium Scale | 40 L/1000 L<br>of water or<br>90 L/ha | Make a single<br>application when<br>trees are in the<br>dormant stage. |

To prevent damage to plant life apply only under proper conditions. Avoid spraying during or just prior to freezing

weather, rain or other unsuitable weather conditions. While thorough coverage is important, avoid over spraying. Plants should be sprayed only when in a healthy condition. Use efficient spraying equipment. For effective Scale control with air blast sprayers, apply at least 2000 L/ha of the spray mixture. Increase volume of spray to 4000 L/ha applied from 4 sides for severely encrusted Scales.

For specific instructions as to the use of dormant oil sprays, consult local agriculture authorities.

#### MIXING INSTRUCTIONS

Before mixing be certain that the spray tank is clean. Fill the tank half full of water with agitator running, pour in the required amount of DORMANT SPRAY OIL. The mixture should turn white indicating good emulsification. After mixing, continue filling the tank and do not stop agitation until contents have been sprayed out. DO NOT USE THIS MATERIAL IF IT DOES NOT EMULSIFY. If used in combination with a fungicide, add the fungicide to the water first, then add the oil.

#### TANK MIXING

DORMANT SPRAY OIL can be mixed with Ferbam, Copper Spray, or Lime Sulphur when applied as a dormant spray. Carefully follow label instructions for each product. Compatibility of DORMANT SPRAY OIL with other pesticides has not been fully evaluated. Therefore, tank mixing with other pesticides is not recommended.

#### PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. Keep in original container during storage. Handle and apply only as recommended and at recommended rates. Do not apply or allow to drift to areas occupied by unprotected humans or beneficial animals. Do not store with or contaminate food or foodstuffs. Do not contaminate streams, ponds, irrigation water or water used by livestock or water used for domestic purposes. Keep product away from fire, open flame, lighted electric bulbs and other sources of heat.

USE WITH CAUTION - DO NOT TAKE INTERNALLY AVOID INHALATION OF SPRAY.

#### FIRST AID

Contains petroleum distillate. IN CASE OF INGESTION do not induce vomiting. Obtain medical attention immediately or contact a poison control centre. IF ON SKIN, remove contaminated clothing and wash thoroughly with soap and water. IF IN EYES, flush with water for 5-10 minutes and obtain medical attention.

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to the spray mixture in the tank.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
