17577

PEST CONTROL PRODUCT ACT

For sanitary pool water, add Chic 12 daily to kill germs and control algae.

Chic 12 is recommended for use in all types of pools: vinyl lined, concrete and fiberglass.

DIRECTIONS

Before adding Chic 12, the pH should be tested and adjusted to within 7.4 to 7.8. Add muriatic acid if pH is high. Add soda ash if pH is low. Chic 12 should be added daily to maintain 0.5 to 1.0 parts per million available chlorine. The use of a test kit is recommended, as the air temperature and the number of people in the pool will affect the amount of Chic 12 required. Under average conditions, Chic 12 should be added daily to pool water according to the following chlorinating guide:

| Pool Capacity (litres) | Daily Chic 12 charge |
|------------------------|----------------------|
| 10,000                 | 125 - 250 mL         |
| 20,000                 | 250 - 500 mL         |
| 50,000                 | 625 - 1.25 L         |
| 100,000                | 1.25 - 2.50 L        |
| 250,000                | 3.25 - 6.25 L        |

Note: First application should be double the indicated amount. Every three weeks, add one week's charge of Chic 12 in one application to ensure proper control of algae, slime and fungus. Avoid using pool until chlorine residual drops below 2.0 p.p.m.
