DIRECTIONS

For the control of Silverfish and Ants

Treat all baseboards and quarter rounds, paying particular attention to all pipe openings, cracks and crevices, and other breeding places, which are likely to harbour nests. Particular attention should be paid to moist, damp and storage areas. These conditions should be corrected.

For the Control of Bedbugs

Treat mattresses, spring coils, etc., as well as all baseboard, quarter rounds, behind pictures, etc. If thoroughly treated, it should remain effective for considerable time. If unable to get under control, may we suggest you call us for professional assistance.

For the Control of Clothes Moths, Carpet Beetles, Fleas
& Dog Ticks

Spray all baseboards, quarter rounds, and carpets, furniture,

drapes, etc. making sure these materials are of animal fibre, not synthetic material, such as orlon, nylon etc. A thorough application will remain effective for one month or longer.

CAUTION

KEEP OUT OF REACH OF CHILDREN

Avoid skin contact and inhalation. Wash hands thoroughly after using. Do not apply it to animals, birds, or plants. Avoid contamination to live fish, kitchen utensils and food.

FIRST AID

Contains petroleum distillates. If swallowed do NOT induce vomiting. Keep patient warm. Call a physician immediately.

TOXICOLOGICAL INFORMATION

For ingestion or aspiration, do not induce vomiting. Give oxygen if necessary. Use antibiotics to prevent or treat bacterial pneumonia, and saline cathartics to promote elimination from the digestive tract. Corticosteroids may be beneficial. Further treatment is supportive and symptomatic.

APPLICATION

Application of insecticide should be made with the use of a continuous hand sprayer, or a tank garden low pressure sprayer. Apply at the rate of 4 Litre/100 m² of surface.
