PRECAUTIONS:

DANGER: CORROSIVE TO EYES AND CAUSES SKIN BURNS. MAY CAUSE ALLERGIC SKIN REACTION. MAY BE HARMFUL IF INHALED.

MAYBE FATAL IF SWALLOWED OR ABSORBED THROUGH THE SKIN.

Do not get in eyes, on skin, on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing vapour or mist. Do not take internally. This product is toxic to fish and wildlife. Treated effluent should not be discharged where it will drain into lakes, streams, ponds or public water. Do not contaminate water by cleaning of equipment or disposal of waters. Apply this product only as specified on this label.

STORAGE: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. If plastic, do not reuse empty container.

DISPOSAL:

- 1. Rinse the emptied container thoroughly and add the rinsings to the treatment site.
- 2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
- 3. Make the empty container unsuitable for further use.
- 4. Dispose of the container in accordance with provincial requirements.
- 5. For information on the disposal of unused, unwanted product and the cleanup of spills contact the Provincial Regulatory Agency or the Manufacturer.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

DIRECTION FOR USE:

Pulp and Paper:

CHIMTOX 240 is recommended for the control of bacterial and fungal slime in the production of paper.

Point of Addition:

CHIMTOX 240 should be added at a point in the system to insure uniform mixing such as the Beater, Hydropulper or Fan or Broke Storage Pump.

Dosage: Apply 300 to 1000 mL of CHIMTOX 240 as supplied per ton (dry basis) of pulp or paper produced, as a slug dose. If needed, repeat daily. Badly fouled systems should be cleaned before initial treatment.

Cooling Towers: CHIMTOX 240 recommended for the removal of slime from fouled towers. Add 0.54 to 0.93 kg of CHIMTOX 240 as supplied per ton of water in the system (equivalent to about 8 to 13 ppm active ingredient). This dosage should be repeated 2 to 3 times per week until fouling has been reduced to an acceptable level, thus establishing microbial control.

Point of Addition: CHIMTOX 240 should be added to the basin, to the distribution boxes, or at any other point where it will be rapidly and uniformly dispersed throughout the system.

Oil Field Injection Water: For the control of slime-forming bacteria and sulphate-reducing (sulphide-forming) bacteria in oil field injection waters, slug treat with 70 to 270 ppm of CHIMTOX 240 microbicide as supplied, in accordance with the severity of bacterial contamination.

Dosage: Apply 133 to 270 ppm CHIMTOX 240 as supplied (13.2 to 26.4 litres per 100 tons of water) at any point from which the material mixes uniformly throughout the system. Repeat the treatment after 3 days or as needed to achieve control. After achieving control, apply 70 to 133 ppm of CHIMTOX 240 supplied (5.3 to 13.2 litres per 100 tons of water) every 7 days or as needed to maintain control.

FIRST AID:

IF ABSORBED: Do not induce vomiting. Drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician or Poison Control Centre immediately.

IF INHALED: Remove immediately to fresh air. If not breathing, apply artificial respiration. If breathing is difficult, give oxygen. Call a physician.

IF ON SKIN: Wash thoroughly with soap and water. Remove and wash contaminated clothing before reuse.

IF IN EYES: Flush with plenty of water for at least 15 minutes. Call a physician.

TOXICOLOGY: Probable mucosal damage may contra-indicate the use of gastric wash. Measures against circulatory shock, respiratory depression and convulsions may be needed.
