SIPHOTROL PLUS is a contact and residual crack and crevice and surface spray. It contains a unique combination of ingredients that kills both adult and pre-adult dog and cat fleas. It kills fleas hidden in carpets, rugs, furniture and pet bedding. One treatment gives continuous protection against pre-adult fleas for 210 days (30 weeks). Direct application of Siphotrol Plus to the insect also kills American brown and American dog ticks, cockroaches, ants, spiders, crickets, silverfish, earwigs and pillbugs. It leaves no bad smell and no sticky mess. Because of the long term flea control provided by Siphotrol Plus, regular use of this product will reduce the need for topical treatment of pets for ectoparasites.

DIRECTIONS FOR USE: SHAKE WELL BEFORE USING: For effective flea control adjust the spray nozzle to create a fine spray and apply uniformly without wetting furniture and carpeting. Thorough applications produce a coating which will vaporize into cracks and crevices for insect control. If re-infestations occur, repeat application. Provide adequate ventilation after use. Thoroughly treat cracks and crevices, baseboards, underneath furniture, localized areas of floors and floor coverings (spot treatment only) and other places where fleas are found.

PRECAUTIONARY STATEMENTS: Harmful if swallowed or absorbed through skin. Avoid breathing spray. Avoid contact with skin, eyes or clothing. Wash thoroughly after handling. DO NOT ALLOW CHILDREN OR PETS TO WALK ON TREATED SURFACES UNTIL COMPLETELY DRY. DO NOT SPRAY ON ANIMALS, HUMANS, PLANTS, FOODSTUFFS, FOOD UTENSILS, FISHBOWLS OR ANIMAL FEED AREAS. DO NOT CONTAMINATE FOODSTUFFS. Remove all pets and cover fishbowls before spraying. Do not use as a space spray. Do not use in areas of food processing plants, restaurants, etc. where food is commercially prepared, processed or exposed. Do not use in serving areas where food is exposed. Thoroughly wash all surfaces that might contact food before re-use.

FIRST AID: If swallowed: Drink 1 or 2 glasses of water and induce vomiting by touching finger to back of throat. Never give anything by mouth to an unconscious or convulsing person. Seek medical attention immediately. If on skin: Remove contaminated clothing and wash affected areas with soap and water. If in eyes: Flush eyes with plenty of water. If irritation persists, call physician.

TOXICOLOGICAL INFORMATION: Chlorpyrifos is a cholinesterase inhibitor. Atropine sulfate by injection is antidotal only if symptoms of cholinesterase inhibition are present.

STORAGE AND DISPOSAL: STORE IN ORIGINAL CONTAINER, AWAY FROM CHILDREN. Protect from freezing or high temperatures. Do not reuse empty container. Wrap empty container and place in household garbage.
