NOTICE TO USER - This control product is to be used only in accordance with the directions on this label. It is an offence under the PEST CONTROL PRODUCTS ACT to use a control product under unsafe conditions.

DIRECTIONS: Brown dog ticks on dogs can be killed by dabbing the handy applicator directly on the tick or cluster of ticks attached to the animal. To control fleas on dogs and cats, invert the applicator and hold firmly against the skin; then slowly circle the neck twice, rub once along the underside, and once down the back of the animal. Apply once or twice weekly as needed. Do not apply to sick, convalescent or nursing animals. Do not apply to animals less than six weeks old. Do not use other pesticides within one week of application.

PRECAUTIONS: Harmful if inhaled or absorbed through the skin.

May be fatal if swallowed. Do not get in eyes. Excessive or prolonged contact of the product with the skin should be avoided. Wash thoroughly with soap and warm water after applying to animals. Wash contaminated clothing with soap and hot water before reuse. Do not reuse container. Do not contaminate food, feed, water, and food preparation areas.

FIRST AID: If poisoning occurs, obtain prompt medical aid.

TOXICOLOGY: Compound depresses cholinesterase. Atropine sulfate is antidotal. 2 PAM is contraindicated.

NOTICE TO BUYER - Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
