BLACK FLAG OUTDOOR FOGGER makes patios, backyards and other unscreened areas more pleasant. It will kill insects up to 6 metres away. It repels flies, mosquitoes, gnats and ants. It will also kill stinging and crawling insects such as yellow jackets, wasps, hornets, crickets, centipedes, ants, sowbugs and spiders.

DIRECTIONS:

Shake well before each use.

FLYING INSECTS:

Spray bushes or grass in the direction of the breeze from a distance of 1.2 to 2 metres so that the fog will drift over the

areas to be treated. Give special attention to areas where insects breed, feed or rest - garbage cans, compost piles and areas adjacent to patios. Spray over patio or picnic area shortly before use. Allow spray to dissipate before occupying area. Repeat as necessary. Spray wasp or hornet nests at night when insects are less active. Avoid heavy wetting of leaves.

CRAWLING INSECTS:

ANTS, CRICKETS, CENTIPEDES, SOWBUGS, SPIDERS: Spray surface of patio or picnic areas well before using, hitting as many insects as possible. Spray ant hills and trails. Spray legs of tables and chairs to repel crawling insects.

CAUTION:

KEEP OUT OF REACH OF CHILDREN. Do not spray toward face. Avoid inhalation of spray mist. Cover exposed foods when spraying. Do not spray on humans or pets. Do not contaminate fish ponds. Spray ornamentals from 1.2 to 2 metres away. Not for indoor use. Discard empty container with household garbage.

WARNING:

Spray only in upright position. Do not use in the presence of open flame or spark. Do not puncture or incinerate container or store at temperature over 50°C. Avoid freezing.

FIRST AID:

If on skin, wash with soap and water. If in eyes, flush with plenty of water. If swallowed, induce vomiting by giving 15 mL of salt in a glass of warm water. Repeat until vomit fluid is clear. Call physician immediately.
