DIRECTIONS FOR USE: Apply C-I-L Diazinon Insect Killer using the hose-end applicator attached. It will dilute this concentrated insecticide for direct spraying of lawns, fruits, vegetables and ornamentals.

1. Read the complete label for application instructions and precautions.
2. Shake container thoroughly before attaching to garden hose.
3. Turn water supply on at the source. Water pressure will build in hose since the sprayer is already in the "OFF" position.
4. To apply product, bend safety tab and turn the control valve clockwise to the "ON" position.
5. For best results, hold sprayer and bottle level.
6. When spraying is complete, turn the control valve clockwise so that the valve indicator arrow is pointing to the "WATER" position on the sprayer. Flush with water to clean sprayer head, then turn the control valve to "OFF" position. Turn water off. Disconnect hose from applicator and store product in original container.

NOTE: "WATER" position is to be used only for cleaning sprayer head.

INSECTS CONTROLLED: Aphids, carrot rust flies, caterpillars, chinch bugs, flea beetles, fruit flies, leafhoppers, leafminers, mealybugs, mites, pine shoot moths, potato beetles, root maggots, rose chafer, scales, thrips.

CROPS OR PLANTS: Apple, apricot, cherry, grape, peach, pear, plum, strawberry, bean, beet, broccoli, cabbage, carrot, cauliflower, celery, cucumber, lettuce, onion, parsnip, pepper, potato, radish, spinach, tomato, azalea, birch, boxwood, carnation, cedar, crabapple, fir, ivy, juniper, mum, oak, pine, rose, spruce, yew.

CAUTION: Rate of delivery of product will vary depending on water pressure, location, time-of-day, length and diameter of hose, etc. Complete contents of container (1 L) can be sprayed in approximately 3 to 6 minutes.

GENERAL GARDEN USE: Spray when insects are noticed and repeat as needed; for carrot rust fly maggot and all fruit fly maggots, spray weekly between June 20th and July 31st. Spray to thoroughly wet foliage but not run off. Do not apply to a food crop within 10 days of harvest except for the following:

tomato - 1 day, cauliflower, broccoli, pepper, strawberry - 5 days, beans, cabbage, cucumber - 7 days; apple, pear, beet, potato - 14 days, grape and peach - 20 days.

CUTWORMS IN VEGETABLES: Apply 250 mL (1/4 of this bottle) evenly over 19 m² (200 sq. ft) of garden immediately before planting and rake into top 8 to 10cm (3-4") of soil.

LAWN INSECTS: For chinch bugs and clover mites, apply treatment after a rainfall or water the lawn prior to pesticide treatment. Apply 500 mL (1/2 of bottle) over 55 m² (600 sq. ft). Repeat 7 days later. For ants, sod webworm (lawn moths) and leatherjackets, apply 500 mL (1/2 of bottle) over 83 m² (900 sq. ft); repeat as necessary.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. May be fatal if swallowed. Do not get into eyes. Avoid contact with skin and inhaling spray mist. Wash thoroughly after handling. Avoid contaminating food and feed. This product is poisonous to bees, fish and wildlife; spray flowers in late evening only; do not contaminate water, ponds, etc.

FIRST AID: Product contains petroleum distillates; if swallowed, DO NOT cause vomiting but rush patient to hospital taking this labelled container with you. If in eyes, flush with water for 15 minutes and get medical attention. If on skin, wash thoroughly with soap and water. If patient is unconscious, give him air.

TOXICOLOGICAL INFORMATION: Stomach lavage is advised. Diazinon is a cholinesterase inhibitor. Atropine is antidotal.

DISPOSAL: Dispose of empty bottle in garbage. Do not reuse container.

For additional product, information or in case of emergency, spills or fire call toll-free at 1-800-268-2806.
