Transonic 100 mouse repeller uses ultrasonic "silent noise" to repel mice.

Wild creatures depend on their hearing for survival. Transonic generates powerful ultrasonic noise that interferes with their hearing, disturbs their nervous systems and makes them leave. It may take a few days or a few weeks, but Transonic is an effective long term solution. The sounds are not noticeable to most people.

Effective against mice. The Transonic 100 produces "silent noise" that is effective in repelling mice.

Just plug it in. Just insert the Transonic 100 into a standard 110V wall socket or use an extension cord to place it closer to problem attics or storage areas. One unit covers up to 93 square meters (1,000 square feet).

Satisfaction guaranteed for 2 years. Weitech makes Transonic units using the best possible materials and quality control. Each unit is unconditionally guaranteed for two years.

Made in USA. Transonic products are designed, assembled and tested with pride at our plant in Sisters, Oregon. We call it the Sound Solution to Pest Control.

WEITECH World Leader in Electronic Pest Control

TRANSONIC (R) 100 Direct Plug-in Electronic Repeller

Covers up to 93 square meters (1000 sq. ft.). LED indicates unit is operating. Power source: 100-115 VAC 50/60 Hz. Power consumption: 0.60 W.
