VISION

Above-Ground

Pool Water Purifier

MODEL: VSP DISPENSING DEVICE

DOMESTIC

REPLACE BRIQUETTE EVERY 30 DAYS

READ THE LABEL AND OWNER'S MANUAL BEFORE USING

To assist in controlling bacteria and algae growth this device will augment bactericidal and algicidal activity of primary disinfectants such as chlorine in swimming pools and spas. A minimum of 0.6 ppm of free available chlorine must be maintained.

WARNING: Staining of pool surfaces may occur due to deposits of copper salts. Excessive levels of copper will increase the probability of this occurrence.

PEST CONTROL PRODUCTS ACT

If your retailer does not have VISION products, please call us at 1-800-338-1013 or fill out and return the reorder card included with this manual.

HOW TO ORDER REPAIR PARTS

If you find any of the parts missing or defective or if you cannot identify a problem, do not take the package or any part of the package back to the place of purchase. Instead, contact: 1-800-338-1013.

When ordering repair parts always give the following information: Part Number, Part Description, Name of Item, Model Number.

WARNING

VISION IS DESIGNED FOR ABOVE GROUND SWIMMING POOLS ONLY. NOT FOR HOUSE-HOLD USE.

1. START-UP INSTRUCTIONS

Before starting up a new VISION seasonal unit, clean debris and algae out of pool and equipment. If you have a Pool Spray or any other attachment on your return fitting it must be removed before installing VISION.

IMPORTANT:

Do not install VISION until the pool water is chemically balanced.

A. Balance Pool Water

All swimming pools require properly balanced water.

1. PH 7.2-7.8
2. Calcium Hardness 200-300 ppm
3. Total Alkalinity 80-120 ppm

NOTE: Consult your dealer for specific water balance instructions.

B. Installation

1. Before installing the purifier, set the calendar ring to the correct month according to the date in which the purifier was installed. Unscrew the front of the purifier from the back and rotate the calendar ring so the arrow on the device is pointing to the correct month (FIG. 1)
2. Install the VISION purifier by threading the purifier into the return fitting of your pool (FIG. 2)

C. Superchlorinate (shock) the pool.

On the first day, super-chlorinate following label instructions of the super-chlorination product employed. This will burn off contaminants and activate the purifier.

D. Activate VISION

1. Run the pump and filter system 24 hours per day for four days. Thereafter, run the pump and filter system 8-12 hours per day depending on bathing load and environmental conditions.

E. Maintain 1-3 ppm residual chlorine level throughout the 4-day activation period.

F. Allow the free chlorine residual to drop to - but not below - 0.6 ppm.

G. Follow the maintenance instructions in this manual.

NOTE: REPLACE BRIQUETTE EVERY 30 DAYS

Each VISION briquette will effectively help your pool water pure, clean and odor free for up to 30 days. The 30 day activation period begins when water has passed through the unit. The briquette has been submerged in water. Once the briquette has been activated it cannot be deactivated and stored for use at a later time.

REMEMBER to replace the briquette change the calendar ring to reflect a new 30 day period.

((SEE ILLUSTRATION))

REPLACING THE VISION BRIQUETTE

- A. Shut off pump.
- B. Unscrew purifier front and remove the old briquette (Fig. 1)
- C. Unscrew directional nozzle from purifier front (Fig. 1)
- D. Place new briquette in square center of the purifier back so it is flush (Fig. 1).

NOTE: DO NOT REMOVE BRIQUETTE FROM ITS PLASTIC HOUSING.

- E. Change the date on the calendar ring to reflect a new 30 day period.
- F. Hold briquette in place with index finger while reinstalling the purifier front (Fig. 2).
- G. Screw directional nozzle onto purifier front.
- H. Turn on pump.

3. VISION COMPATIBILITY

Avoid using VISION with the following:

Copper-based algaecides . Bromine or bromide chemicals.

4. VISION POOL WATER MAINTENANCE

A. Ingredients

VISION seasonal unit . Chlorine* . pH and Total Alkalinity

adjusting chemicals . Total Hardness increaser (if needed) .
Water test Kit . Cyanuric Acid.

NOTE: Once the 4-day activation period is completed, allow the free chlorine residual to drop to - but not below - 0.6 ppm free available chlorine.

*Several delivery methods exist for chlorine. These include granules, tablets, liquid, electrical chlorine generators, etc. Each method has its own merit. Consult your dealer.

WHEN	WHAT TO DO
EVERY DAY	RUN PUMP AND OPERATE FILTER SYSTEM AT LEAST 8 HOURS DAILY
ONCE A WEEK	BALANCE pH AND TOTAL ALKALINITY.
TWICE A WEEK	CHECK CHLORINE RESIDUAL. ADD CHLORINE TO MAINTAIN 0.6 ppm FREE AVAILABLE CHLORINE.
AS NEEDED	IF THE POOL WATER STARTS TO LOOK HAZY, SUPER-CHLORINATE (SHOCK) FOLLOWING LABEL INSTRUCTIONS OF THE SUPER-CHLORINATION PRODUCT EMPLOYED. (ADD CYANURIC ACID TO MAINTAIN 50 ppm).

NOTE: AFTER HEAVY USE OR RAINSTORMS, ADDITIONAL SUPER-CHLORINATION TREATMENTS ARE RECOMMENDED.

REPAIR PARTS

KEY NO.	PART NO.	QTY.	DESCRIPTION
1	62045	1	DIRECTIONAL NOZZLE**
2	55125	1	PURIFIER FRONT
3	55124	1	PURIFIER DATE RING
4	56041	1	BRIQUETTE
5	55123	1	PURIFIER BACK
*	91267	1	REORDER INFORMATION CARD
*	94172	1	OWNER'S MANUAL

* NOT SHOWN

** IF YOU BOUGHT A POOL PACKAGE THE DIRECTIONAL NOZZLE INCLUDED
IN YOUR SKIMMER OR RETURN FITTING PARTS BAG.

REPLACE YOUR VISION BRIQUETTE
