HILITE 90G

GRANULES DE CHLORATION STABILISES
STABILIZED CHLORINATING GRANULES

CONTROLS BACTERIA AND ALGAE
IN SWIMMING POOL WATERS

DOMESTIC

GUARANTEE:

TRICHLORO-S-TRIAZINETRIONE	100%
Available Chlorine Content	90%

REGISTRATION NO. 18257
PEST CONTROL PRODUCTS ACT

CAUTION

POISON CORROSIVE

READ THE LABEL BEFORE USING

MANUFACTURED BY:
NISSAN CHEMICALS INDUSTRIES LTD.
TOKYO, JAPAN

IMPORTED BY:
TOYOMENKA CANADA LTD.
TORONTO DOMINION BANK TOWER
SUITE 2808
TORONTO, ONTARIO
M5K 1K7

DIRECTIONS FOR USE:

1. Maintain recommended daily levels as determined by testing kit.

Free available chlorine:	1.0 - 3.0 ppm
pH:	7.2 - 7.8
Total alkalinity:	100 - 120 ppm
Calcium hardness:	200 - 300 ppm

2. For outdoor pools, chlorine residuals can be protected from

destruction by the sun's rays by adding 300g of stabilizer (Cyanuric Acid) per 10,000 L of pool water to yield the required initial concentration of 30 ppm.

3. If using an automatic chlorinator, fill the chamber(s) with HILITE 90 and adjust flow rate, according to manufacturer's recommendations, to maintain proper chlorine residual. Adding HILITE 90 to the pool's skimmer basket is an alternative chlorine feed method. Daily usage should be approximate 25g of HILITE 90 per 10,000 L of pool water.

NOTE: Hot weather, heavy pool usage and rain may require higher usage rates to maintain proper chlorine residuals.

4. Periodic superchlorination of pool water is recommended. Follow label instructions of superchlorination product being employed.
5. HILITE 90 contains stabilizer which can accumulate in pool water. Keep stabilizer within the range of 30 - 100 ppm by dilution with fresh water.

PRECAUTIONS:

- Keep out of reach of children.
- Dangerous gas formed when mixed with acid.
- Do not mix with any other chemical.
- Strong oxidizing agent. May cause fire or explosion if contaminated.
- Avoid contact with skin and eyes.
- Harmful if swallowed.
- Rinse container thoroughly before discarding. Do not reuse.
- To dispose of chemical, flush into sewer with large quantities of water.

FIRST AID: If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, drink one glass of milk or water. Call a physician immediately.
