

Evaluation Report for Category B, Subcategory 3.4 Application

Application Number: 2012-4886
Application: New product labels: Application method
Product: CGS60-Chlorine Generator System
Registration Number: 30942
Active ingredients (a.i.): Device
PMRA Document Number : 2295586

Purpose of Application

The purpose of this application was to register a new chlorine generator system, CGS60-Chlorine Generator System, for use in residential pools and spas.

Chemistry, Health and Environmental Assessments

Chemistry, health and environmental assessments were not required for this application.

Value Assessment

Efficacy data were submitted to confirm the daily free available chlorine (FAC) output of CGS60-Chlorine Generator System. The device can generate a maximum of 0.19 kg FAC per day. The maximum pool volume which can be treated with one CGS60-Chlorine Generator System is 62,000 L and for spas is 37,000 L. An Intertek certificate of electrical safety has also been provided for this device.

Conclusion

The PMRA has completed an assessment of available information for CGS60-Chlorine Generator System and has found the information sufficient to grant full registration.
