

Evaluation Report for Category B, Subcategory 3.14 Application

Application Number: 2015-7112
Application: Changes to Product Labels - Classifications
Product: Tomcat Mouse Killer IV
Registration Number: 30657
Active ingredients (a.i.): Diphacinone
PMRA Document Number: 2625907

Purpose of Application

The purpose of this application was to amend the Tomcat Mouse Killer IV registration to add a bait station made from an alternate material. This is a disposable product for use indoors and outdoors to control house mice.

Chemistry and Environmental Assessments

Chemistry and environmental assessments were not required for this application.

Health Assessments

Toxicology and dietary exposure assessments were not required for this application.

The refillable Tomcat Mouse Killer IV constructed with the alternative material, to control mice indoors and outdoors, provides the same level of child and pet tamper-resistance as the registered model of the same bait station. Risks are not of concern when homeowners follow label precautions and instructions, and label statements caution not to allow children or pets to handle the bait station.

Value Assessment

The addition of a bait station made of a different type of plastic is not expected to impact the value of Tomcat Mouse Killer IV.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided and has found the information sufficient to amend the product registration for Tomcat Mouse Killer IV to add a bait station made from an alternate material.
