

Evaluation Report for Category B, Subcategory 3.13 Application

Application Number: 2017-1139
Application: B.3.13: Change to Product Label
Product: Interlox Paramove 50
Registration Number: 31393
Active ingredients (a.i.): Hydrogen Peroxide
PMRA Document Number : 2825809

Purpose of Application

The purpose of this application was to remove the respirator requirement during a sea cage treatment using the tarpaulin method from the label of Interlox Paramove 50.

Chemistry, Environmental and Value Assessments

Chemistry, environmental and value assessments were not required for this assessment.

Health Assessment

Interlox Paramove 50 is highly acutely toxic by the oral route, slightly acutely toxic by the dermal route, moderately acutely toxic by the inhalation route, is corrosive to both skin and eyes, but not a dermal sensitizer.

An evaluation of the inhalation exposure study provided by the registrant has resulted in the determination that the removal of the respiratory requirement from the label is acceptable.

Occupational exposure to individuals handling Interlox Paramove 50 is not expected to result in health risks of concern when the product is used according to label directions. Precautionary and personal protective equipment statements on the product label aimed at mitigating worker exposure are considered adequate to protect individuals from any potential risk due to occupational exposure.

Bystander and residential exposure is not expected to result in health risks of concern when the product is used according to label directions.

A dietary exposure assessment was not required for this application.

Conclusion

The PMRA has reviewed the information provided in support of the removal of the respirator requirement during a sea cage treatment using the tarpaulin method from the label. Based on the results of this review, the removal of the respirator requirement during a sea cage treatment using the tarpaulin method from the label is acceptable.
