

## Evaluation Report for Category B, Subcategory 2.1 Application

**Application Number:** 2015-4338  
**Application:** Changes EP or MA Product Chemistry-Guarantee  
**Product:** Saniclear40  
**Registration Number:** 30794  
**Active ingredients (a.i.):** Device  
**PMRA Document Number :** 2587698

### Purpose of Application

The purpose of this application was to amend the product label for Saniclear40, as the chlorine output has increased due to a change in the electronic mother board of the generator.

### Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required for this application.

### Value Assessment

Value information from a laboratory trial was submitted to confirm the daily free available chlorine (FAC) output of Saniclear 40. The device can generate a maximum output of hypochlorous acid equivalent to 0.54 kg of FAC per day which is sufficient to generate 1-3 ppm of FAC in pools and 3-5 ppm of FAC in spas with a maximum volume of 170 000 L. Therefore, the use of the Saniclear 40 for use in domestic swimming pool and spas is acceptable.

### Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided in support of the product, Saniclear40, and has found the information sufficient to modify the chlorine output of the device.
