Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added a new use on canola to the product label of Equinox EC Herbicide, containing technical grade tepraloxydim. The specific use approved in Canada is detailed on the label of Equinox EC Herbicide, *Pest Control Products Act* Registration Number 27603.

A corresponding maximum residue limit (MRL) was proposed in the consultation document published on 25 November 2008, Proposed Maximum Residue Limit PMRL2008-45, *Tepraloxydim*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRL was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRL is legally in effect as of the publication date of this document and is in addition to the MRLs already established for tepraloxydim.

Established Maximum Residue Limit for Tepraloxydim

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Tepraloxydim	<i>(EZ)-(RS)</i> -2-{ 1-[(<i>2E</i>)-3-chloroallyloxyimino] propyl}-3-hydroxy-5-perhydropyran-4-ylcyclohex-2-en-1-one, including metabolites convertible to 3-perhydropyran-4-ylglutaric acid and 3-hydroxy-3-perhydropyran- 4-ylglutaric acid, as parent equivalent	0.3	Rapeseed (canola)

A complete list of all MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
