

Evaluation Report for Category B, Subcategory 2.3, 2.4 Application

Application Number: 2009-1999
Application: B.2.3 (Product chemistry - identity of formulants)
B.2.4 (Product chemistry - proportion of formulants)
Product: Simplicity
Registration Number: 28887
Active ingredients (a.i.): Pyroxsulam (JUA)
PMRA Document Number: 1908630

Purpose of Application

The purpose of this application was to amend the formulation of Simplicity (Registration number 28887). Simplicity was granted a NAFTA label in January 2008.

Chemistry Assessment

Simplicity is formulated as a suspension containing pyroxsulam at a nominal concentration of 2.87% (30 g/L). This end-use product has a density of 1.0421 g/mL and pH of 6.21 for a 1% dilution in water. The chemistry data requirements for Simplicity are complete.

Based on the comparison of active ingredients, associated impurities and formulants, the U.S. and Canadian versions of Simplicity have been assessed to be chemically equivalent.

Health, Environmental and Value Assessments

Health, environmental and value assessments were not required for this application.

Conclusion

The PMRA has evaluated all available information and was able to support the proposed formulation change for Simplicity.
