

Evaluation Report for Category C, Subcategory C.3.10 Application (New or Changes to Product Label – Tank Mixes)

Application Number: 2012-2770
Application: Category C, Subcategory C.3.10 (new or changes to tank mixes)
Product: GF-184 Herbicide
Registration Number: 29286
Active ingredients (a.i.): 2.5 g/L florasulam and 100 g/L fluroxypyr
PMRA Document Number : 2242464

Background

GF-184 Herbicide (co-formulation of 2.5 g/L florasulam and 100 g/L fluroxypyr) is presently registered at the rate of 1.0 L/ha (i.e. 102.5 g a.i./ha) for control of cleavers, volunteer flax, wild buckwheat, and kochia in spring wheat, durum wheat, and spring barley in the Prairie Provinces and Peace River Region of British Columbia. For specific details of uses, application rates and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

Purpose of Application

Dow AgroSciences has applied to amend the registration of GF-184 Herbicide to replace the tank mix partner of Everest Solupak 70 DF (Reg. No. 26448) with Everest 2.0 (Reg. No. 30342).

Chemistry, Health, and Environment Assessments

Chemistry, health, and environment assessments were not required as there was no change to the product chemistry, formulation, and use pattern.

Value Assessment

Replacing the tank mix partner of Everest Solupak 70 DF with Everest 2.0 on the GF-184 Herbicide label was supported for the following reasons:

- Everest 2.0 was previously determined to be agronomically equivalent to Everest Solupak 70 DF (PMRA # 2018654).
- The requested application rate for Everest 2.0 is currently labeled.

Conclusions

The PMRA has completed an assessment of the subject application and has found the information sufficient to amend the registration of GF-184 Herbicide to replace the tank mix partner of Everest Solupak 70 DF with Everest 2.0.
