

Evaluation Report for Category B, Subcategory 3.13 Application

Application Number: 2014-1267
Application: B.3.13 – Changes to product labels - precautions
Product: Cruiser Maxx Potato Extreme
Registration Number: 31024
Active ingredients (a.i.): Thiamethoxam (THE), Fludioxonil (FLD), Difenconazole (DFZ)
PMRA Document Number : 2448955

Purpose of Application

The purpose of this application was to amend the Cruiser Maxx Potato Extreme label to change the restriction on the amount of product applied per hectare for potato seed treatment so that the restriction was stated in terms of weight of potatoes treated per day as opposed to amount of product per hectare.

Chemistry Assessment

A chemistry assessment was not required for this application.

Health Assessments

Toxicological and food residue assessments were not required for this application.

The change of the restriction “DO NOT apply more than 468 mL product per hectare” to “DO NOT plant more than 128 700 kg of treated potato seed pieces/day” is not expected to result in exposure that will exceed the current registered use of Cruiser Maxx Potato Extreme. As such, no health risks of concern are expected when workers follow the label directions and wear the protective equipment identified on the label.

Environmental Assessment

No environmental concerns were identified. The potato seeding rates for Cruiser Maxx Potato Extreme are not expected to result in increased environmental loading relative to the overall thiamethoxam, fludioxonil and difenoconazole use patterns.

Value Assessment

A value assessment was not required for this application.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided in support of the product, Cruiser Maxx Potato Extreme, and has found the information sufficient to amend the restriction on the label.
