

Evaluation Report for Category B, Subcategory 3.7 Application

Application Number: 2016-4154

Application: B.3.7 - Change Pre-Grazing Interval

Product: Octtain XL Herbicide

Registration Number: 30077

Active ingredients (a.i.): 2,4-D (Present as Low Volatile Esthers) + Fluroxypyr

PMRA Document Number: 2714787

Purpose of Application

The purpose of this application was to change the pre-grazing interval from 3 days to 0 days for pasture and rangeland uses on the labels of Octtain XL Herbicide.

Health Assessments

Previously reviewed residue data from field trials conducted in/on grasses were reassessed in the framework of this petition. The change in pre-grazing interval will not result in residues of fluroxypyr or 2,4-D that exceed the established MRLs for edible livestock matrices and will not pose health risks of concern to any segment of the population, including infants, children, adults and seniors.

Chemistry, Environmental and Value Assessments

Chemistry, environmental and value assessments were not required for this application.

Conclusion

PMRA has reviewed the information provided in support of the change to the pre-grazing interval. Based on the results of this review, the change to pre-grazing interval is acceptable.
