

## Evaluation Report for Category B, Subcategory B.3.11 Application (New or Changes to Product Label – New Pests)

**Application Number:** 2017-2917  
**Application:** Category B.3.11 (New or changes to product label – New Pests)  
**Product:** Milestone Herbicide  
**Registration Number:** 28517  
**Active ingredient (a.i.):** Aminopyralid at 240 g/L  
**PMRA Document Number:** 2786837

### Background

Milestone Herbicide is registered for control of broadleaf weeds, invasive plants, and woody plants in rangeland, permanent pasture, and industrial and other non-crop areas. It is recommended for post-emergent weed control at 0.25-0.5 L/ha based on weed spectrum. For specific details of uses, application rates and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

### Purpose of Application

The purpose of this application is to amend the registration of Milestone Herbicide to include claims of control of clover at 0.38 L/ha and control of fireweed, purple loosestrife, and orange hawkweed and suppression of Japanese knotweed at 0.5 L/ha.

### Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, formulation, or use pattern.

### Value Assessment

The addition of clover, fireweed, purple loosestrife, orange hawkweed, and Japanese knotweed on the Milestone Herbicide label will provide Canadian users another option to control these hard-to-control perennial weeds in rangeland, pastures, and industrial and non-crop areas.

Value information available for review included data from field trials and use history information on Milestone Herbicide registered in the US (EPA Reg. No. 62719-519). The information demonstrated that Milestone Herbicide can be expected to provide control of clover at 0.38 L/ha and control of fireweed, purple loosestrife, and orange hawkweed and suppression of Japanese knotweed at 0.5 L/ha.

## **Conclusion**

The PMRA has completed an assessment of the subject application and has found the information sufficient to support the requested amendment to the registration of Milestone Herbicide.
