

Evaluation Report for Category B, Subcategory 3.1 Application

Application Number: 2018-4029
Application: Change to Product Labels – Storage Stability
Product: Loopex FC
Registration Number: 33105
Active ingredient (a.i.): *Autographa californica* nucleopolyhedrovirus FV11
PMRA Document Number: 2990424

Purpose of Application

The purpose of this application was to amend the label of the microbial end-use product, Loopex FC, to extend the storage stability of this product.

Product Characterization and Analysis

Storage stability and microbial contaminant analysis data were provided for two batches that were stored at various temperatures for up to 24 months. The tested batches were stable when stored at -18°C and 5°C for up to 24 months of storage. At these temperatures and storage periods, microbial contaminant levels remained within the required limits.

The storage period on the label for Loopex FC can, therefore, be extended to 24 months at temperatures of up to 5°C.

Health, Environmental and Value Assessments

Health, environmental and value assessments were not required for this application.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided, and has found the information sufficient to support the label amendment of Loopex FC to extend the storage stability of this product.
