

## Evaluation Report for Category B, Subcategory B.3.10 Application (New or Changes to Product Label – Tank Mixes)

**Application Number:** 2023-0465  
**Application:** Category B.3.10 (New or changes to product label – Tank mixes)  
**Product:** DRAFT  
**Registration Number:** 31904  
**Active Ingredient (a.i.):** 50% thifensulfuron-methyl and 25% tribenuron-methyl  
**PMRA Document Number:** 3469027

### Purpose of Application

The purpose of this application was to remove (1) the adjuvant requirement when DRAFT is applied in tank mix with MCPA Ester and (2) sulfonylurea (SU) tolerant canola as a host crop.

### Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

### Value Assessment

Value information submitted for review consisted of data from replicated field trials and a scientific rationale. The trial data is considered sufficient to support the removal of the adjuvant requirement when DRAFT is applied in tank mix with MCPA Ester. The removal of the adjuvant requirement reduces users cost to apply the tank mixture of DRAFT + MCPA Ester for control of broadleaf weeds in small grain cereals.

No information is required to remove a host claim from the product label.

### Conclusion

The PMRA has completed an assessment of the subject application and has found the information sufficient to support the requested label amendments.
