

Evaluation Report for Category B, Subcategory 3.10, 3.11 Application

Application Number: 2023-1456
Application: New or Changes to the Product Label – Tank Mixes, New Pests
Product: Pixxaro A Herbicide
Registration Number: 31303
Active ingredient(s) (a.i.): 250 g a.e./L fluroxypyr (present as 1-methylheptyl ester) and 16.25 g/L halauxifen (present as methyl ester).
PMRA Document Number: 3470208

Background

Pixxaro A Herbicide is an emulsifiable concentrate herbicide containing 250 g a.e./L fluroxypyr (present as 1-methylheptyl ester) and 16.25 g/L halauxifen (present as methyl ester). For specific details of uses, application rates and methods, precautions, restrictions, and personal protective equipment requirements, refer to the product label.

Purpose of Application

The purpose of the subject application is to add the general tank mixing statement to the product label and amend the claim for control of volunteer alfalfa to top growth control.

Chemistry, Health and Environmental Assessment

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

A thorough review of the label determined that the addition of the general tank mixing statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling (March 16, 2023).

The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated pest management programs or the control of a broader range of pests, with an associated cost- and time-savings by the user.

Value information submitted to support the amendment to the claim for control of volunteer alfalfa to top growth control consisted of a rationale and a scientific publication. Based on the weight of evidence, the amendment to the claim for control of volunteer canola to top growth control is supported.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the subject application and has found the inclusion of the general tank mixing statement and amendment to the claims for control of volunteer alfalfa to top growth control on the Pixxaro A Herbicide label acceptable.
