

Evaluation Report for Category B, Subcategory B.3.10 Application (New or Changes to Product Label – Tank Mixes)

Application Number: 2024-0766
Application: Category B.3.10 (New or changes to product label – Tank mixes)
Product: Simazine 480 Herbicide
Registration Number: 23181
Active Ingredient (a.i.): 480 g/L simazine and related triazines
PMRA Document Number: 3620096

Purpose of Application

The purpose of this application is to amend the registration of Simazine 480 Herbicide to (1) include the general tank mix statement as per the published PMRA Guidance Document – Tank Mix Labelling and (2) update the minor use liability statement as requested by the Agency.

Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required as there was no change to product chemistry, product formulation, or use pattern.

Value Assessment

A thorough review of the label determined that the addition of the general tank mix statement is acceptable as it is consistent with the requirements in the PMRA Guidance Document – Tank Mix Labelling.

The inclusion of the general tank mixing statement on the label allows growers greater flexibility to select tank mixtures to control pests in labelled crops. Flexibility in the selection of tank mix partners may contribute to resistance management practices, integrated weed management programs or the control of a broader range of pests, with an associated cost- and time-savings by the user.

The update on the minor use liability statement is supported since it is required by the PMRA.

Conclusion

The PMRA has completed an assessment of the subject application and has found the information sufficient to support the requested label amendments.
