

Evaluation Report for Category B, Subcategory 3.11 Application

Application Number: 2024-2774
Application: Streamline Category B (New Pests)
Applicant: UPL AgroSolutions Canada Inc.
Product: Evito 480 SC Fungicide
Registration Number: 30408
Active ingredient(s) (a.i.): Fluoxastrobin
PMRA Document Number: 3648993

Purpose of Application

The purpose of this application was to add claims of suppression of alternaria black spot and suppression of black leg on Crop Subgroup (CSG) 20A - Rapeseeds to the Evito 480 SC Fungicide label (Reg. No. 30408).

Chemistry, Health and Environmental Assessments

A chemistry assessment was not required since there was no change to product chemistry. Health and environmental assessments were not required since the use pattern, including host crop, application rates and timings, of the component product remained unchanged.

Value Assessment

The results of seven field efficacy trials conducted on canola in Canada between 2016 and 2022 and scientific rationales were reviewed to support the claims. Acceptable efficacy was observed on canola when treated with Evito 480 SC Fungicide according to the use pattern. The value information supports the claims of suppression of alternaria black spot on canola, crambe, gold of pleasure (camelina), hare's ear mustard, lesquerella, lunaria, mustard seed, oil radish, rapeseed, and sweet rocket and suppression of black leg on canola, gold of pleasure, hare's ear mustard, lesquerella, lunaria, meadowfoam, mustard seed, oil radish, rapeseed, and sweet rocket. This registration provides an initial or additional product for growers of canola and other minor oilseed crops to manage both diseases.

Conclusion

The Pest Management Regulatory Agency has completed an assessment of the information provided, and has found the information acceptable to support the claims of suppression of alternaria black spot and black leg on specific crops in Crop Subgroup 20A – Rapeseeds when applied according to the use pattern.
