

Evaluation Report for Category B, Subcategory 4.6 Application

Application Number: 2011-1544
Application: Application to fulfill conditions of full registration
Product: GF2050 Herbicide
Registration Number: 29745
Active ingredients (a.i.): Aminopyralid, Metsulfuron-methyl
PMRA Document Number: 2463963

Background

GF2050 Herbicide, containing the active ingredients aminopyralid and metsulfuron-methyl, was first registered in 2010 as a selective herbicide for post-emergent control of annual and perennial broadleaf weed, invasive plants and shrubs on rangeland, permanent pasture, rights-of-way, industrial and other non-crop areas of Canada under Application Number 2008-5009. As a condition of full registration, confirmatory storage stability data were required.

For further information on GF2050 Herbicide, consult the Evaluation Report under Application Number 2008-5009 located in the PMRA Public Registry on the Health Canada website.

Purpose of Application

The purpose of this application was to fulfill the conditions of full registration.

Chemistry Assessment

The storage stability study that was provided was determined to be acceptable. The chemistry requirements have been fulfilled.

Health, Environmental and Value Assessments

Health, environmental and value assessments were not required for this application.

Conclusion

The PMRA conducted an evaluation of the subject application and determined that the conditions of full registration have been fulfilled. The use of the product in accordance with the label has value and will not pose unacceptable health or environmental risk.
