

Evaluation Report for Category B, Subcategory 3.2 Application

Application Number: 2014-1277
Application: Changes to Product Labels-Application Timing
Product: DuPont Lumiderm Insecticide Seed Treatment
Registration Number: 30893
Active ingredients (a.i.): Cyantraniliprole
PMRA Document Number : 2538015

Purpose of Application

The purpose of this application was to remove label statements prohibiting applications of Group 28 insecticides subsequent to use of DuPont Lumiderm Insecticide Seed Treatment and to add resistance management statements to the label.

Chemistry, Health, and Environmental Assessments

Chemistry, health, and environmental assessments were not required for this application.

Value Assessment

Modification of the label statements prohibiting any application of a Group 28 insecticide subsequent to a DuPont Lumiderm Insecticide seed treatment has value in making this mode of action available later in the growing season. Submitted value information about the residual activity of a Group 28 insecticide applied to soil or through planting of treated seed or seed pieces supports a minimum 60-day interval before making a foliar application on the same crop.

Conclusion

Following review of the application, the PMRA approved the label amendments to remove restrictions prohibiting application of Group 28 insecticides subsequent to use of DuPont Lumiderm Insecticide Seed Treatment and to add resistance management statements.
