

## Evaluation Report for Category B, Subcategory 3.12 Application

**Application Number:** 2015-1949  
**Application:** Changes to Product Labels –New site  
**Product:** Entrust Insecticide  
**Registration Number:** 30382  
**Active ingredients (a.i.):** Spinosad  
**PMRA Document Number:** 2655818

### Purpose of Application

The purpose of this application was to amend the end-use product Entrust Insecticide, containing spinosad, to update and include the PMRA approved revisions of crop groups.

### Chemistry Assessment

A chemistry assessment was not required for this application.

### Health Assessments

A toxicology assessment was not required for this application.

The crop group amendments and updates have no impact on the registered use pattern of Entrust Insecticide. Exposures to spinosad by mixers, loaders, applicators, and post-application workers are not expected to increase compared to the exposures from the registered use pattern when all label precautions and directions are followed.

No residue data were submitted for spinosad in support of the amendments to the Entrust Insecticide label. The approved use patterns on the revised crop groups were determined to be within that of the registered label. Therefore, the previously reviewed residue data were reassessed in the framework of the current submission.

### Maximum Residue Limits

The recommendation for maximum residue limits (MRLs) for spinosad was based upon the previously reviewed field trial data. MRLs to cover total residues of spinosad in/on crops are proposed as shown in Table 1.

<b>Table 1. Summary of Field Trial Data Used to Support Maximum Residue Limit(s) (MRLs)</b>						
Commodity	Total Application Rate (g ai/ha)	PHI (days)	Residues (ppm)		Currently Established MRL (ppm)	Recommended MRL (ppm)
			LAFT	HAF T		
Head lettuce (with wrapper leaves)	Foliar / 483-527	1	0.12	3.21	7.0 (CG4A, except leaf lettuce)	8.0 (CG 4-13) <sup>a</sup>
Spinach	Foliar / 483-527	1	1.48	6.57		
Mustard greens	Foliar / 500	3	0.015	4.82	7.0 (CSG5B)	
Broccoli	Foliar / 500	3	0.027	0.400	2.0 (CSG 5A)	2.0 (CG 5-13) <sup>b</sup>
Cabbage (with wrapper leaves)	Foliar / 500	3	0.02	0.360		
Tomato	Foliar / 494-542	1	0.018	0.123	0.2 (CG 8)	0.4 (CG 8-09) <sup>c</sup>
Bell Peppers	Foliar / 503-524	1	0.022	0.074		
Non bell peppers	Foliar / 511-514	1	0.039	0.165		
Apples (US)	Foliar / 495-577	7	<0.02	0.089	0.1 (CG 11)	0.2 (CG 11-09) <sup>d</sup>
Apples (CDN)	Foliar / 487-510	7	<0.04	0.069		
Pears	Foliar / 273-952	7	<0.02	0.08		
Peaches	Foliar / 496-521	14	<0.02	0.061	0.2 (CG 12)	0.2 (CG 12-09) <sup>e</sup>
Cherry	Foliar / 489-511	7	<0.02	0.135		
Plum	Foliar / 501-518	7	<0.02	<0.02		
Celery (untrimmed)	Foliar / 483-527	1	0.397	1.74	7.0 (CG4B)	8.0 (CG 22; except asparagus and kohlrabi) <sup>f</sup>

<sup>a</sup> The MRL is proposed to replace the current established MRL of 7.0 ppm for crop subgroup 4A and include all food commodities in the crop group 4-13 (except leaf lettuce).

<sup>b</sup> The MRL is proposed to replace the current established MRL of 2.0 ppm for crop subgroup 5A and include all food commodities in the crop group 5-13.

<sup>c</sup> The MRL is proposed to replace the current established MRL of 0.2 ppm for crop group 8 and include all food commodities in the crop group 8-09.

<sup>d</sup> The MRL is proposed to replace the current established MRL of 0.1 ppm for crop group 11 and include all food commodities in the crop group 11-09.

<sup>e</sup> The MRL is proposed to replace the current established MRL of 0.2 ppm for crop group 12 and include all food commodities in the crop group 12-09.

<sup>f</sup> The MRL is proposed to replace the current established MRL of 7.0 ppm for crop subgroup 4B and include all food commodities in the crop group 22, except asparagus and kohlrabi.

Following the review of all available data, MRLs as proposed in Table 1 are recommended to cover total residues of spinosad. Residues in these crop commodities at the proposed MRLs will not pose an unacceptable risk to any segment of the population, including infants, children, adults and seniors.

### **Environmental Assessment**

An environmental assessment was not required for this application.

## **Value Assessment**

A rationale was provided to extrapolate the labelled uses to include the Crop Groups 4-13 (leafy vegetables), 5-13 (brassica head and stem vegetables), 8-09 (fruiting vegetables), 11-09 (pome fruit), 12-09 (stone fruit), and 22 (stalk, stem, and leafy petioles). Extrapolation to the expanded commodities in the crop groups was acceptable as plant structure within the crop groups is sufficiently similar to allow for thorough coverage, and feeding behavior of the pests on the proposed commodities should be similar to that on the labelled crops.

## **Conclusion**

The Pest Management Regulatory Agency has completed an assessment of the available information and is able to support the updated PMRA approved revisions of crop groups on the label of Entrust Insecticide.
